Patented Pending

Continued from inside...  
from which smoke escape is visible. Avoid breathing cartridge smoke.  
1. While only pressing black trigger button, rotate trigger clockwise until you hear a click.  
2. Check the nozzle for any blockage. If blocked, clean the nozzle with a clean cloth.  
3. Remove the top to expose the trigger on the cap.  
4. Position the nozzle on the hole and press the trigger. The maximum pressure time is 5 seconds.  
5. After the nozzle is removed, the trigger will return to its original position.  
6. Repeat steps 1-5 for each hole to be treated.  
7. First runway and clear one or two other runways.  
8. Contact your distributor for more information on the use of this product.  
9. Do not use this product in areas where it may be harmful to humans or animals.  
10. Do not use this product in areas where it may be harmful to crops or other plants.  
11. Read the specific instructions for the type of animal you intend to control.

APPLICATION STEPS:  
1. Read the specific instructions for the type of animal you intend to control.

HOW TO USE VICTOR QUICK-STRIKE™ MOLE AND GOPHER GASSER  
1. Read the specific instructions for the type of animal you intend to control.

CAUTION: This product is a fumigant. It is intended for use in enclosed areas only. Do not use in open areas.

USE RESTRICTIONS: Do not use in areas where it may be harmful to humans or animals.

PRECAUTIONS: Use in well-ventilated areas only. Do not use in areas where it may be harmful to humans or animals.

KEEP OUT OF REACH OF CHILDREN  
WARNING: This product can cause you to breathe fumes.  
Caution: This product is a fumigant. It is intended for use in enclosed areas only.

OUTSMARTING RODENTS SINCE 1898.™

4 PACK

# QUICK-STRIKE™ MOLE & GOPHER GASSER

Waterproof • Windproof • Lights Every Time

Kills Moles, Pocket Gophers,  
Woodchucks\*, Norway Rats\*\*,  
Skunks & Ground Squirrels

Long burn time!

No lighter necessary!

Easy ignition feature

Protect your lawn

MADE IN USA  
OF FOREIGN COMPONENTS

NET CONTENTS:  
Four 1.75 oz (49.61g) Gassers

TOTAL NET WT. 7 oz (198.44g)

ACTIVE INGREDIENTS:  
Sodium Nitrate ..... 50.00%  
Sulfur ..... 38.00%  
Charcoal ..... 9.00%  
OTHER INGREDIENTS: ..... 3.00%  
TOTAL ..... 100.00%

KEEP OUT OF  
REACH OF CHILDREN  
WARNING:  
See inside panel for  
additional precautionary  
statements and first aid.

FIRST AID	
<b>If Inhaled:</b>	- Move person to fresh air. - If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. - Call a poison control center or doctor for further treatment advice.
<b>If In Eyes:</b>	- Hold open and rinse slowly and gently with water for 15-20 minutes. - Remove contact lenses, if present, after the first five minutes, then continue rinsing eye. - Call a poison control center or doctor for treatment advice.
Have the product or label with you when calling a Poison Control Center or going for treatment. In case of emergency, for additional information call 800 858 7378.	

### PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

**WARNING:** Causes eye irritation. After ignition cartridge produces toxic gases such as oxides of sulfur and carbon monoxide. Fumes from ignited cartridge may be harmful if inhaled. Avoid contact with eyes, skin or clothing. Avoid breathing fumes. Wash thoroughly with soap and water after handling.

### ENVIRONMENTAL HAZARDS

This product is highly toxic to wildlife. Check all burrows for signs of non-target species. If present, do not treat burrows. It is a Federal offense to use any pesticide in a manner that results in the death of an endangered species. See Package insert label for complete Environmental Hazards text, including Endangered Species Considerations.

### CHEMICAL HAZARDS

Once ignited by the fuse, this cartridge will burn vigorously until completely spent and is capable of causing severe burns to exposed skin and clothes, and of igniting dry grass, leaves or other combustible materials.

### PHYSICAL AND CHEMICAL PROPERTIES:

COMBUSTIBLE. Do not store near open flames.

### FOLLOW THESE INSTRUCTIONS:

**MOLES** (lawns, golf courses, non-crop areas) – The presence of moles may be indicated by a network of surface ridges in the soil or by a series of conical mounds of earth pushed up from deep burrows. **For Surface Ridges:** Prior to treatment, determine which burrows are active according to one of the following two methods. Either press down a small section of the tunnel or remove a one inch section of the tunnel's roof. Mark these sections and recheck in 24-hours. The burrow is considered active if the flattened runway has been raised up or if the roof has been repaired. Only treat active burrows. Follow numerical APPLICATION STEPS above. If your excavations have divided main runway into sections, treat each portion. **For Conical Mounds:** Remove center plug from the conical mound with a garden tool or long-handled spoon. Follow application steps above. If your excavations have divided main runway into sections, treat each portion.

**POCKET GOPHERS** (meadows, reforested areas) – Pocket gophers throw out low fan shaped mounds on either side of their underground tunnel. These lateral tunnels coming to the surface are on the flat side of the fan and are plugged with soil. With a garden tool or long-handled spoon, carefully remove the plug. Note these sections and recheck in 24-hours. The burrow is considered active if the plug has been repaired. Only treat active burrows. To locate main runways, probe about 6 to 8 inches away from mounds by use of an iron bar, a strong stick, or other suitable implement. Resistance on probe will drop suddenly and probe will fall about two inches when main runway is entered. Follow numerical APPLICATION STEPS above. One cartridge placed in the end of a runway should be satisfactory. Additional cartridges may be used if treatment takes place in the middle of runway or if runway is "T-shaped" to reach pocket gophers that do not use the untreated side of the plugged runway. Re-treat in 5-7 days if new or residual activity appears.

**NORWAY RAT\*** (non-crop areas) – Use only where burrows are isolated from homes, barns, and other man-made structures. Do NOT use inside buildings or anywhere where gasses could enter buildings. Follow numerical APPLICATION STEPS above. Find the next closest burrow and treat as above.

**GROUND SQUIRRELS** (rangeland) – Follow numerical APPLICATION STEPS above. Find the next closest burrow and treat as above.

**SKUNKS** (non-crop areas) – Locate all entrances to den. Do not treat dens under inhabited structures or buildings where toxic gases could reach humans, pets or domestic animals including livestock. Follow numerical APPLICATION STEPS above. KANGAS – Use only where burrows are isolated from homes, barns, and other man-made structures. Do NOT use inside buildings or anywhere where gasses could enter buildings. Follow numerical APPLICATION STEPS above. Find the next closest burrow and treat as above.

**WOODCHUCKS\*** (open fields, non-crop areas) – Locate all burrow entrances. Select one for use and close all other entrances with rock and dirt. Follow numerical APPLICATION STEPS above. Consult State game laws before using this product for woodchuck control.

**For larger animals, or for longer or multiple runways, use more than one cartridge.**

### STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.  
**PESTICIDE STORAGE:** Store only in original container in a dry place inaccessible to children and pets. **PESTICIDE DISPOSAL AND CONTAINER HANDLING:** Non-refillable container. Do not reuse or refill this container. If empty: Place in trash or other for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

\* Not for use on woodchucks in California

\*\* Use in North Carolina on Norway rats only

### ENDANGERED SPECIES CONSIDERATIONS

**General Considerations**  
NOTICE: The killing of a member of an endangered species due to the use of gas cartridges may result in a fine and/or imprisonment under the Endangered Species Act. All users of this product must determine whether endangered species are known to occur or might occur in the intended use area. Consult the nearest U.S. Fish and Wildlife Service regional office or the appropriate State current information on habitats occupied by endangered species.

**Specific Considerations** Use this product according to these instructions AND the instructions in the Endangered Species Protection Bulletin (see the "Use Restrictions" found under the "Directions for Use" section) to protect endangered and threatened species.

**Black-footed Ferret (*Mustela nigripes*):** To limit risks to the black-footed ferret and to avoid destruction of its prairie box, do not use this product within 4.3 miles (7 kilometers) of any prairie dog town unless the colony is an isolated black-tailed prairie dog town less than 90 acres in size or an isolated white-tailed or Gunnison prairie dog town less than 200 acres in size, or unless the town has been appropriately surveyed, using methods acceptable to the U.S. Fish and Wildlife Service, and found not to contain black-footed ferrets and found by the FWS not to be a suitable site for ferret reintroductions. Use of this product within the occupied habitats of the organisms listed immediately below is limited to qualified individuals who have been trained to distinguish dens and burrows of target species from those of non-target species. Such individuals may be wildlife biologists, certified applicators, representatives of California State or Federal agencies, or agents of county agricultural offices or university extension offices.

**Fresno kangaroo rat (*Dipodomys nitroideus exilis*):** in Fresno and Merced Counties, California.

**Giant kangaroo rat (*D. ingens*):** in Merced, Fresno, Kings, Tulare, Kern, San Luis Obispo, and Santa Barbara Counties, California.

**Stephen's kangaroo rat (*D. stephensi*):** in Riverside, San Diego, and San Bernardino Counties, California.

**Tipton kangaroo rat (*D. n. nitroideus*):** in Kings, Tulare, Kern and Fresno Counties, California.

**Point Arena mountain beaver (*Aplodontia rufa nigra*):** in Mendocino County, California.

**San Joaquin kit fox (*Wulpes macrotis macrotis*):** unless authorized by the U.S. Fish and Wildlife Service in Alameda, Contra Costa, Fresno, Kern, Kings, Merced, Monterey, San Benito, San Joaquin, San Luis Obispo, Santa Barbara, Santa Clara, Stanislaus, or Tulare Counties, California.

**Desert Tortoise (*Gopherus agassizii*):** in Arizona, southern California, southern Nevada, and southern Utah. Do not use this product within the occupied habitats of the endangered animals listed immediately below.

**Morro Bay kangaroo rat (*D. heermanni morroensis*):** in San Luis Obispo County, California.

**Coachella Valley fringe-toed lizard (*Uma inornata*):** in the Coachella Valley area of southern California.

**Island night lizard (*Xantusia verisiana*):** on Santa Barbara, San Clemente, and San Nicolas Islands, California.

**Blunt-nosed leopard lizard (*Gambelia ellysi*):** Do not use this product within the occupied habitat of the blunt-nosed leopard lizard in Fresno, Kern, Kings, Merced, Monterey, San Benito, San Luis Obispo, Santa Barbara, Santa Clara and Stanislaus Counties, California, from October 1 to April 15 unless a specific blunt-nosed lizard protection plan for this period is approved by the U.S. Fish and Wildlife Service and fully implemented. Use of this product in occupied habitat of this species from April 15 through September 30 is limited to daylight hours when air temperatures are 77-86°F (25-30°C).

**San Francisco garter snake (*Thamnophis sirtalis tetranebris*):** Do not use this product within the occupied habitat of the San Francisco garter snake in San Mateo, San Francisco, Santa Clara, and Santa Cruz Counties, California from November 1 to March 30 unless a specific San Francisco garter snake protection program for this period is approved by the U.S. Fish and Wildlife Service and fully implemented. Use of this product in occupied habitat of this species under such approved programs from April 1 through October 31 is limited to qualified individuals who have been trained to distinguish dens and burrows of target species from those of non-target species. Such individuals may be wildlife biologists, certified applicators, representatives of California State or Federal agencies, or agents of county agricultural offices or university extension offices.

**Eastern Indigo snake (*Drymarchon corais couperi*):** Do not use this product within habitat types and locales known to support the Eastern indigo snake throughout Florida and the coastal plain of Georgia.
