

This organic formula will safely protect plants against browsing damage. Deer, Rabbits, Groundhogs and other herbivores (plant-eating animals) are instinctively repelled from areas treated with this granular repellent since it represents the presence of carnivores (meat-eating animals).

Our formulation contains granules infused with botanical oils...stronger, more effective and longer lasting than plain blood meal.

DIRECTIONS:

FOR GENERAL APPLICATIONS: Generously sprinkle around flowers, shrubs, trees and vegetables to keep animals from browsing.

FOR PERIMETER APPLICATIONS: Apply a 16" wide strip of repellent around area to be protected. Interior strips should also be applied every 5' on beds larger than 8' x 10'. Larger herbivores (deer, elk, moose) may require a heavier application rates than for smaller herbivores (rabbits, hares, groundhogs, opossums). **Reapply as necessary.**
Approx coverage: up to 1500 sq ft
