Advantages of Ant Baits

By DoMyOwn staff

1. Baits are far **more target specific** than contact spray and dust insecticides.
2. Baits are far **more cost effective** when compared with the labor-intensive inspections used to locate nests and subsequent treatment techniques which require drilling and dusting.
3. Baits can be used in **sensitive accounts** where more toxic spray and dust insecticides can't, such as kitchens and food preparation areas.

*While baits do work more slowly than sprays or dusts, the delay also allows baits to work more completely and efficiently towards elimination of the entire ant colony.

Premium, Professional Ant Baits:

Advance 360A Dual Choice Ant Bait Stations
Ants won't be able to resist the dual choice bait matrix available in each Advance 360A Dual Choice Ant Bait Station. When the bait is carried to the nest, it will kill the queen and eventually eliminate the entire colony!

Advance 375A Select Granular Ant Bait
Advance Ant Bait is a protein-based bait that eliminates common varieties of household ants.

Gourmet Ant Bait Gel
This gel uses a special insect attractant that mimics honeydew and enhances bait acceptance by a variety of Protein Feeding Ants, Sweet Feeding Ants, and roaches.

Maxforce FC Ant Bait Stations
Maxforce FC Ant Bait Stations start to kill ants in just six hours, and tests show 90% population reductions in just four days.

Maxforce Complete Granular Bait
Maxforce ant bait offers a combination ingredients which satisfy the insects' changing tastes and nutritional needs.

Niban Fine Granular Bait (1 lb.)
A moisture-resistant, fine granular bait that can be used indoors and outdoors.
