Pantry Pest Traps

By DoMyOwn staff

Pantry Pest Traps

Pantry Pest Traps represent the simplest and most effective solution for getting rid of pantry pests including moth and beetle product pests in kitchens, pantries, bathrooms, warehouses, and food processing plants.

Benefits

- **Easy To Use**
- **Non-Toxic**
- **No-Mess, No-Fuss**
- **Disposable**
- **Effective against moth and beetle product pests**

How Pantry Pest Traps Work

Pantry Pest Traps are generally constructed of cardboard or paper lined on the inside with pheromone impregnated glue strip. The insect sex pheromones powerfully attract the moth or beetle pests, luring them to the trap where they get stuck on the glue strip and are not able to escape.

Pro Pest Pantry Moth Trap

Pheronet Pantry Pest Traps are designed to capture pantry moths including Indian Meal Moths, Almond Moths and Raisin Moths. This trap will also attract and kill Cigarette Beetles. Trap will stay active 4-6 weeks.

How To Use

To use this trap simply remove the release paper on the trap to expose the glue. The trap is already pre-baited with pheromones, so all you need to do is form the trap into a box form and hang it in areas of moth activity.

The trap can be hung with a hook or hanger or secured to a wall or other surface with double-sided tape.
