How To Kill Poa Annua Grass

How to Kill Poa Annua
By DoMyOwn staff

OVERVIEW

Poa annua, also known as annual bluegrass, is a weed that can cause unsightly spots in your lawn during the spring when poa annua seed heads bloom and in the summer when the weed dies.

Treating poa annua can be tricky as seeds can lay dormant for years before growing. That's why a two-step approach to poa annua treatment may be necessary. Both pre-emergents and post-emergents will control poa annua in your yard. Read below to learn more.

STEP 1 Apply a Pre-Emergent Herbicide

As their name suggests, pre-emergent herbicides are applied before weeds emerge. In the case of poa annua, that means applying a pre-emergent herbicide like Dimension 2EW, Hi-Yield Weed and Grass Stopper, Barricade 4FL, or another pre-emergent labeled for poa annua on your lawn before poa annua seeds begin to germinate.

Read the label of any pre-emergent you may consider using to be sure it is compatible with the type of lawn you have. Not all pre-emergents can be used on all grass types.

Apply in the fall before the first frost occurs, before the soil temperature reaches 70 degrees or below. If you live in an area that does not have frost, you would apply before temperatures drop. The timing of your application depends on where you live. Consult our lawn care calendars to determine when to apply your pre-emergent herbicide treatment.

It is advised that you do two fall pre-emergent herbicide treatments, spaced 30 days apart from one another. This will help ensure your entire lawn is treated, reducing the number of spots you might miss with one treatment. It will also increase the amount of time the pre-emergent treatment will last.

You will also need to apply a spring pre-emergent herbicide treatment sometime between late January and early May, before temperatures rise and weeds begin to germinate. Again, consult our seasonal calendars or contact your local extension office for timing advice.

Watch the video below to learn how to apply a pre-emergent herbicide.
