 Pennington's Bermudagrass makes growing a beautiful lawn easy. Years of research go into every product we make and each seed is specially selected for turf quality, color and overall performance.

PLANTING SPECIFICATIONS
 Planting Rate:
 New Lawn - 2 lbs./1,000 sq. ft.
 Overseeding - 1 lbs./1,000 sq. ft.
 This Package Covers:
 7,500 sq. ft. - New Lawns
 15,000 sq. ft. - Overseeding
 Light Required - Full Sun
 Traffic Tolerance - Excellent
 Drought Tolerance - Excellent
 Planting Depth - 1/2"
 Seeding Emergence - 7-21 Days
 Recommended Mowing Height - 1" - 1 1/2"

ESPECIFICACIONES DE SIEMBRA
 Índice de Siembra:
 Césped Nuevo - 2 lbs./1,000 pies cuadrados
 Sobre-Siembra - 1 lbs./1,000 pies cuadrados
 El Paquete Cubre:
 7,500 pies cuadrados - Césped Nuevo
 15,000 pies cuadrados - Sobre-Siembra
 Luz Requerida - Plano Sol
 Tolerancia al Tráfico - Excelente
 Tolerancia a la Sequía - Excelente
 Profundidad de Siembra - 1/2"
 Surgimiento de Planta - 7-21 Días
 Altura de Corte Recomendada - 1" - 1 1/2"

NOTICE: Arbitration/mediation required by several states. Under the seed laws of several states, arbitration, mediation, or conciliation is required as a prerequisite to maintaining a legal action based upon the failure of seed, to which this notice is attached, to produce an agreement. The consumer shall file a complaint (written for FL, IL, IN, MS, MT, SC, TN, WA, signed only CA, CA, IL, MD, SD) along with the required filing fee (where applicable) with the commissioner/director/secretary of agriculture, seed commissioner (NY), or chief horticultural officer within such a time as to permit inspection of the crops, plants, or trees by the designated agency and the seedman from whom the seed was purchased. A copy of the complaint shall be sent to the seller by certified or registered mail or as otherwise provided by state statute.

* Guaranteed to Grow subject to adequate sunlight, soil, temperature and moisture conditions.

WARNING: Treated Seed: This seed has been treated with Metolaxam, commonly known as Apron XL and Cytolam (azoxystrobin), gibberellic acid and indole-3-butyric acid, commonly known as Stimulate™ Yield Enhancer, at the rate recommended by the manufacturer. Do not use for feed, food or oil purposes.
 Store away from food and feedstuffs. Do not allow children, pets or livestock to have access to treated seeds.
 If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
 If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
 If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
 Causes substantial but temporary eye irritation. Harmful if swallowed or absorbed through skin. Avoid contact with skin, eyes or clothing. Avoid breathing dust from treated seed. Work upward while loading planters. Workers may choose to wear a dust mask. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.
 For Emergencies or questions related to metolaxam applied to this seed, please call 1-800-888-8372.

NOTICE: The color green as applied to grass seed is a registered trademark that is registered in the U.S. Patent Trademark Office by Pennington Seed, Inc. Pennington uses the safest colorant available.

OPTIMAL GROWING AREA
BEST TIME TO PLANT SEED
 The best time to plant Bermudagrass seed is in late Spring to Summer.
 Bermudagrass seed germinates and establishes best when average daily temperatures are between 70 F and 90 F.

PLANTING INSTRUCTIONS
4 Easy Steps to Planting Seed
 1. PREPARE THE SOIL:
 Bare Spots and New Lawns
 - Remove all debris from planting area.
 - Till or rake to loosen top 2" to 3" of soil.
 - Rake smooth to create a flat, level planting area.
 Overseeding and Thin Areas
 - Mow the lawn as short as possible & remove clippings.
 - Rake thoroughly removing thatch (dead grass) and debris to expose the soil.
 - Aerate lawn if possible to allow better air and water penetration into the soil.
 2. FERTILIZE PLANTING AREA
 - Apply a starter fertilizer at the manufacturer's recommended rate.
 - Lime may need to be added in some areas to ensure proper soil pH levels.
 3. PLANT THE SEED
 - Using a drop-type, rotary or hand held spreader, apply the seed evenly to avoid skips, overlapping & streaking.
 - Gently rake, working seed into soil about 1/2".
 4. WATER SEEDED AREA
 - Water daily to keep soil moist.
 - Do not allow the top 1/2" of the soil to become dry until seedlings have completely emerged.
 - Once grass becomes established, reduce watering to 1/2" twice a week.

SETTINGS FOR COMMONLY USED SPREADERS

Spreader	Overseeding	New Lawn Seeding
Scotts® Hand Held Spreader (HandGreen®)	2	3
Scotts® Broadcast Rotary Spreader (Turf Builder®)	2	2 1/2
Edgeward® Mini-Turf Builder® Edgeward® (OLX)	2 1/2	2 1/2
Scotts® Edgecast®	2 1/2	2 1/2
Scotts® Drop Spreader (AccuGreen®)	2 1/2	2 1/2

For more information go to www.penningtonseed.com

ADDITIONAL TIPS
 - Conduct a soil test to determine pH level and add soil amendments accordingly for optimal lawn development.
 - Begin mowing once turf reaches 1/2" taller than desired mowing height.
 - Do not apply weed control herbicides until after the third mowing.
 - Once turf is established (4-6 weeks after planting), begin an annual fertilization maintenance program.

INSTRUCCIONES DE SIEMBRA
4 Pasos Fáciles para Plantar Semilla
 1. Preparar la Tierra
 Áreas Descubiertas y Céspedes Nuevos
 - Remueva todo el desecho del área que va a sembrar.
 - Rastille para aflojar de 2" a 3" de la cobertura de la tierra.
 - Rastille suavemente para crear una área de siembra nivelada y pareja.
 Para Sobre-Siembra y Áreas Poco Densas
 - Corte el césped existente lo mas corto posible y remueva toda la corteza.
 - Rastille profundamente para remover todo el césped seco y desechos para exponer la tierra.
 - Si es posible aerea el césped para permitir la penetración de aire y agua a la tierra.
 2. Fertilización
 - Aplique un fertilizante de inicio usando los índices recomendados por el fabricante para buenos resultados.
 - En algunas regiones es necesario utilizar Cal para balancear el nivel de pH en la tierra.
 3. Sembrar la Semilla
 - Use una propagadora de mano, rotaria o tipo-caída, aplique la semilla de modo uniforme con los índices recomendados para evitar áreas sin semilla, áreas con sobre-sembrado o áreas manchadas.
 - Rastille suavemente el área sembrada para que la semilla quede a una profundidad de la tierra de 1/2".
 4. Regar el Área Sembrada
 - Riegue diariamente para mantener la tierra húmeda.
 - No permita que 1/2" de la superficie de la tierra se seque hasta que las plantas hayan emergido completamente.
 - Una vez que el césped se haya establecido reduzca el agua a 1/2" dos veces por semana.
