

# PEST XPERT™

## FOAMING INSECT KILLER

### Specimen Label

- Kills ants\*, crickets, silverfish and ground beetles
- Kills cockroaches, fleas and ticks
- Kills on contact and keeps on killing for up to 4 months
- Penetrates deep into cracks and crevices
- Disappearing foam creates protective home barrier
- Perfect for uneven and difficult-to-reach surfaces

\*Does not include fire, pharaoh or harvester ants

#### ACTIVE INGREDIENT:

Lambda-cyhalothrin.....	0.25%
OTHER INGREDIENTS .....	99.75%
	100.00%

**KEEP OUT OF REACH OF CHILDREN**

See inside for precautionary statements.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. For information regarding medical emergencies or pesticide incidents, call 1-888-740-8712.

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.  
**SHAKE WELL BEFORE USE. HOLD CONTAINER UPRIGHT. APPLY IN SHORT BURSTS.**  
**READ ENTIRE LABEL BEFORE USE**

#### **BARRIER TREATMENT** **OUTDOOR SURFACES ON AND AROUND BUILDINGS**

Treat outside surfaces of buildings such as exterior siding, foundations, porches, window frames, eaves, patios, and garages.

## RESTRICTIONS

All outdoor applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses:

1. Treatment to soil or vegetation around structures.
2. Applications to lawns, turf and other vegetation.
3. Applications to building foundations, up to a maximum height of 3 feet.

Do not water the treated area to the point of runoff.

Do not make applications during rain.

Do not apply directly to pet(s).

Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors, and eaves) are limited to spot and crack-and-crevice applications, only.

Application is prohibited directly into sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies or aquatic habitat can occur. Do not allow the product to enter any drain during or after application.

## BEFORE YOU USE

To facilitate application, remove debris and leaf litter from next to the foundation, cut back vegetation and branches that touch the foundation, and move or rake back rocks, deep mulch, or other potential pest harborage next to the foundation.

## HOW TO APPLY

Apply as a coarse spray to thoroughly and uniformly wet the foundation and/or band area so that the insecticide will reach the soil or thatch level where pests may be active. Applying a continual band of insecticide around a building foundation and around windows, doors, service line entrances, eaves, soffits, vents, roof overhangs, and other areas can greatly reduce the potential for entry by crawling pests.

## HOW TO USE OUTDOORS

**To kill Ants (excluding Fire Ants, Pharaoh Ants and Harvester Ants):** Spray around ant trails and hills. Spray around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray on and around debris until surface is slightly wet. Treatment of infested fences and tree holes is permitted.

**To kill Cockroaches, Carpenter Ants, Spiders (excluding Black Widow and Brown Recluse), Crickets, Firebrats, Silverfish and other listed crawling insects:** Spray outside surfaces of screens, doors, window frames or wherever insects may enter the home. Also spray surfaces around light fixtures, on porches, in garages and other places where insects land or congregate. For barrier treatments, apply at the rate of 4 seconds of spraying per 3 linear feet. Pests may also be sprayed directly with an application of spray for 1 second.

**To kill Asian Lady Beetles, Boxelder Bugs, and Stink Bugs:** Treat in late summer or fall just before pests begin looking for winter shelter. Spray siding, eaves, around windows, doors, utilities and window screens. To help reduce infestations treat cracks and crevices, attics and other indoor winter hiding places.

**To kill Fleas and Ticks, including those that may carry/transmit Lyme disease:** Spray outside surfaces around pet house, kennel or sleeping quarters. Spray fleas and ticks directly with a 1 second application. For barrier treatments, apply at the rate of 4 seconds of spraying per 3 linear feet.

**Applications around Swimming Pools:** Do not apply directly to swimming pools or swimming pool systems. Apply as a spot or crack-and-crevice treatment to impermeable surfaces such as tiled walkways around pools.

**Applications in and on Boats:** Do not apply to boat surfaces that contact water. Broadcast applications to exterior surfaces of boats are prohibited. Spot treatments may be made to exterior surfaces that do not contact water. Use inside boats, ships and vessels is permitted. Do not reapply for 21 days. Do not allow product to drain or wash off into water bodies or other aquatic habitats.

**Vinyl and Aluminum Siding:** Applications made to vinyl and aluminum siding (particularly lightly colored, aged, weathered or otherwise damaged) may result in staining, bleaching, or discoloration. Factors such as extreme heat or direct sunlight can promote damage when using this product. Before applying this product to vinyl or aluminum siding, treat a small area and evaluate 30 minutes later to allow any potential staining to occur. Regardless of the test results, do not apply to vinyl or aluminum siding when exposed to direct sunlight or during the heat of the day.

## HOW TO USE INDOORS

**To kill Ants (excluding Fire Ants, Pharaoh Ants and Harvester Ants), Beetles, Cockroaches, Carpenter Ants, Crickets, Firebrats, Spiders (excluding Black Widow and Brown Recluse), Silverfish and other listed crawling insects:** Spray directly into cracks and crevices, apply to visible pests with a 1 second spray, in walls, dark corners of rooms, cabinets and closets, along and behind baseboards, beneath and behind sinks, stoves, refrigerators and cabinets, around plumbing and other utility installations, around waste containers and wherever else these pests may find entrance.

**To kill Asian Lady Beetles, Boxelder Bugs, and Stink Bugs:** Spray around doors, window frames or wherever insects may enter the home. Also spray surfaces around light fixtures, on porches, in garages and other places where insects land or congregate.

**To kill Fleas and Ticks, including those that may carry/transmit Lyme disease:** Spray infested areas around pet beds and resting quarters, nearby cracks and crevices, along and behind baseboards, window and door frames, and localized areas of floor coverings where these pests may be present. Apply directly to pests with a 1 second spray. Test inconspicuous sample of fabric or rug for staining before use. Old bedding of pets should be removed and cleaned or replaced with clean, fresh bedding after treatment of pet area. Do not treat pets with this product. To control the source of flea infestations, treat your pet with a product registered for animal application.

## STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

### PESTICIDE STORAGE:

Store in a cool, dry area. Always store pesticides in the original container. Store away from food and pet food.

### PESTICIDE DISPOSAL AND CONTAINER HANDLING

Do Not Puncture or Incinerate!

Non-refillable container. Do not reuse or refill this container.

**If empty:** Place in trash or offer for recycling if available.

**If partly filled:** Call your local solid waste agency for disposal instructions.

## PRECAUTIONARY STATEMENTS

### ENVIRONMENTAL HAZARDS

This pesticide is toxic to environmental organisms, including fish and invertebrates. Do not apply directly to or near water. Drift and runoff may be hazardous to fish in water adjacent to treated areas. Do not contaminate water when disposing of equipment, washwater, or rinsate. See Directions for Use for additional precautions and requirements.

### PHYSICAL OR CHEMICAL HAZARDS

**Contents under pressure.** Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.
