concentration is less than ten (10) times the Permissible Exposure Limit (PEL) use a quarter or half mask respirator with a N95 dust filter or a single use dust mask rated N95. If dust concentration is greater than ten times and less than fifty times the PEL, a full face respirator fitted with replaceable N95 filters is recommended. A dust concentration greater than fifty and less than two hundred times the PEL use a power air purifying (positive pressure) respirator with a replaceable N95 filter. If dust concentration is greater than two hundred time the PEL, use a type C, supplied air respirator (continuous flow, positive pressure), with full face piece, hood or helmet.

Avoid dust. Avoid contact with eyes. Handle in accordance with good industrial hygiene and safety practice. When using, do not eat or drink. Wash hands before breaks and immediately after handling the product.
