

PRIME SOURCE

AZOXY SELECT™

Two Active Ingredients that Provide Excellent Performance Even Under High Temperatures

ACTIVE INGREDIENT

Azoxystrobin
Difenoconazole

% ACTIVE INGREDIENT

18.2% Azoxystrobin
11.4% Difenoconazole

FORMULATION

Suspension Concentrate

CHEMICAL FAMILY

Strobilurin
Triazole

BRAND ALTERNATIVE

Briskway®

MODE OF ACTION

QoI Inhibitor, Demethylation Inhibitor

RESTRICTED USE

None

SIGNAL WORD

Caution

PACKAGING INFORMATION

4x1 gal.

Azoxy D Select™ is a great tool for golf turf disease management. Formulated with two powerful ingredients combining FRAC 11 and FRAC 3 modes of action. Azoxy D Select provides broad spectrum disease control and resistance management utility even under high temperature conditions during the summer months.

- Labeled for the control of more than 20 turf diseases including Anthracnose, Brown Patch, Dollar Spot, Fairy Ring, Gray Leaf Spot, Southern Blight, Summer Patch, Take-All Patch and Waitea Patch
- Contains Azoxystrobin and Difenoconazole
- No growth regulation effects or phytotoxicity
- No heat restrictions
- Dual modes of action provide disease resistance management protection
- Preventive and curative protection
- Convenient liquid formulation for easy tank mixing
- Exceptional rainfastness and rapid uptake

AZOXY SELECT™

FUNGICIDE

Application Information:

Azoxy D Select™ is recommended for the control of more than 20 troublesome diseases on golf course turf only, and is most effective when applied prior to disease development. Apply Azoxy D Select in sufficient spray solution for good turf coverage, which is required for good disease control. Repeat applications at specified intervals for as long as required. For the control of foliar diseases allow Azoxy D Select to dry before irrigation. For the control of soil-borne diseases Azoxy D Select can be watered in after application.

Azoxy D Select is a broad-spectrum fungicide containing two active ingredients for application as a foliar spray, in alternating spray programs, or in tank mixes with other registered pesticides. Azoxy D Select is compatible with many commonly used fungicides, liquid fertilizers, herbicides, insecticides, and biological control products. If tank mixes are desired, observe all directions, precautions, and limitations on labeling of all products used.

Under certain conditions conducive to extended infection periods use another registered fungicide for additional applications if the maximum annual amount of Azoxy D Select has already been used. If resistant isolates to Group 11 or Group 3 fungicides are present, efficacy can be reduced for certain diseases. The higher rates in the rate range and/or shorter spray intervals may be required under conditions of heavy infection pressure with highly susceptible varieties, or when environmental conditions are conducive to this disease pressure.

Anthracnose
Brown Patch
Cool Weather Brown Patch
Dollar Spot
Fairy Ring
Gray Leaf Spot
Gray Snow Mold
Leaf Spot Melting Out
Microdochium Patch
Necrotic Ring Spot
Pink Patch
Powdery Mildew
Red Thread
Rhizoctonia Large Patch
Rusts (leaf, stem, stripe)
Southern Blight
Summer Patch
Take-All Patch
