Azalea Camellia & Rhododendron

PLANT FOOD

Which Plants	Azalea	Calla Lily	Rhododendron	Cleyera	Delphinium	Camellia	Yew
	Caladium	Aucuba	Columbine	Pyracantha	Dogwood	Croton	Holly
	Ixora	Star Jasmine	Easter Lily	Fern	Gardenia	Hibiscus	Laurel
	Hydrangea	Magnolia	Japanese Maple	Cyclamen	Ligustrum	Heather	Pine, Fir
	Viburnum	White Cedar	Tuberous Begonia	Crape Myrtle	Spruce	Juniper	Mahonia

When To Apply

Apply as soon as growth begins, in the spring for most plants. Do not apply immediately preceding bloom. Discontinue use during the late summer and early fall.

How To Apply

Sprinkle correct amount evenly around the plant about 12 inches out from the trunk. Apply water. Continue feeding 4 to 6 weeks during the growing season. Discontinue use during the late summer or early fall.

FOR ESTABLISHED PLANTS	FOR POTTED PLANTS
1 - 2 ft. high 4 Tbs	4" Pot 1/2 Tsp
2 - 3 ft. high 1/3 cup	6" Pot 1 Tsp
3 - 5 ft. high 2/3 cup	8" Pot 2 Tsp
Over 5 ft. high 1 cup	10" - 12" Pot 1 Tbs

NOTE: Azaleas, Camellias, and Rhododendrons are shallow rooted plants that thrive in acid soils rich in organic matter. Be sure to plant these plants in a well-drained area. When pruning these plants, wait until after they have flowered or you may remove immature flower buds.

NOTE: Always water thoroughly after applying fertilizer

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>

Azalea Camellia & Rhododendron

PLANT FOOD

10-6-8

NITROGEN
 Nitrogen stimulates leaf growth and gives plants their rich green color.

PHOSPHATE
 This nutrient is important for normal root development. Good roots are vital for plants to take up water and nutrients. Phosphorus also helps stimulate blooms in flowering plants.

POTASSIUM
 Also called potash, potassium helps plants better tolerate extreme weather conditions and contributes to the overall vigor of plants.

Specially formulated to feed plants which thrive in acid soils
