

The Horse World's Most Trusted Name®

PRO CMC®

Gastric Relief Formula

Horses being fed a high grain, low fiber diet, combined with the physical and emotional stress of training, shipping, weaning or drug therapies are susceptible to equine gastric distress. ProCMC proactively guards against equine gastric distress and helps to maintain a healthy stomach.

It protects by coating the lining of your horse's stomach and neutralizing stomach acids. Its buffered formula soothes and coats while providing an essential source of calcium and magnesium, which is known to promote strong bones and a healthy cardiovascular system. ProCMC is highly palatable with a delicious apple flavor.

For Maintenance of All Horses

Feeding Directions: Shake well before use. Thoroughly mix into feed.

- For mature horses, feed 1 oz. (30 mL) - 2 oz. (60 mL) once or twice daily.
- For foals, feed 1 oz. (30 mL) once or twice daily or as recommended by your veterinarian.
- For some horses it may be easiest to dose orally with a syringe.

Safe and effective when used as directed.

Guaranteed	Analysis:	Ingredients	Statement:
Calcium (Min).....	1.5%	Calcium Carbonate,	Water,
