

# MEET THE BIG DOG IN FLEA AND TICK PROTECTION

## ACTIVYL® PROTECTOR BAND FOR DOGS

Activyl® Protector Band combines proven tick control and flea-killing power to keep your dog safe and pest-free for 6 full months.

### LONG-LASTING

Tick and flea protection for up to 6 months.<sup>1</sup>

### WATER-RESISTANT

Remains effective for 6 months, wet or dry.<sup>1</sup>

### ADJUSTABLE

One size fits all dogs.<sup>1</sup>

### EFFECTIVE

Kills ticks that may transmit serious diseases, such as Lyme Disease.<sup>1</sup>

**ACTIVYL® PROTECTOR BAND FOR DOGS SHOULD BE APPLIED AT LEAST 10-14 DAYS BEFORE EXPECTED EXPOSURE TO FLEAS AND TICKS.**

# EASY TO USE

Advanced technology in a no-mess solution: As the dog moves and the protector band rubs against the coat, the gentle friction releases a small amount of the active ingredient deltamethrin from the surface of the Aktivyl® Protector Band. The natural oils of the skin carry the active ingredient over the whole body, forming a protective layer.

- 1 Buckle the band and check that it is secure.
- 2 Tighten band until two fingers can fit snugly under the band.
- 3 Trim off excess, leaving 2 inches beyond the buckle.
- 4 Wash hands with soap and water.
- 5 Check fitting every 2-3 weeks. Make sure the collar isn't too tight or too loose.
- 6 Use a new Aktivyl® Protector Band every 6 months for year-round protection!

For more information, visit [Aktivyl.com](https://www.aktivyl.com)

\*Your dog must wear an Aktivyl® Protector Band for 1 to 2 weeks before protective levels are established over the entire body. Maximum effectiveness may not occur for up to 3 weeks, so it's best to apply the Aktivyl® Protector Band at least 10-14 days before you anticipate tick and flea exposure.
