

## NEW PRODUCT ANNOUNCEMENT

# UltraMate SG™

- UltraMate SG is a highly concentrated (70%) sulfonated potassium humate in a unique, dry soluble granule formulation.
- Soluble Granules (SG) are easy to handle, dust free and dissolve quickly in a variety of liquid solutions ranging from 2-12 pH.
- Contains both fulvic and humic acids and provides 14% potassium and 6% sulfur.
- Humic substances enhance the plant's ability to take in essential nutrients and can aid in improving soil structure.
- Can be applied through spray equipment, fertigation and drip irrigation equipment in turf, landscape, nursery and agriculture.
- Soluble Granules (SG) eliminate the need to ship and handle water which provides significant savings in freight and storage.

<b>PRODUCT CODE</b>	ULTRAMATE6X2
