Abamectin 0.15 EC
Miticide/Insecticide

Specimen Label

For Agricultural/Commercial Use To Control Leafminers and Mites & To Suppress Aphids, Whiteflies and Thrips on Ornamental Plants.

ACTIVE INGREDIENT:
Abamectin (CAS No. 65195-56-4 and 65195-55-3): 1.9%
INERT INGREDIENTS: 98.1%
TOTAL: 100.0%

1 gallon contains 0.15 lb. abamectin

EPA Reg. No. 73220-10
EPA Est. No. 37429-GA-02

KEEP OUT OF REACH OF CHILDREN
WARNING / AVISO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

See additional Precautionary Statements and Directions For inside booklet.

Manufactured For FarmSaver.com, LLC

First Aid

If swallowed
• Call a poison control center or doctor immediately for treatment advice.
• Do not give any liquid to the person.
• Do not induce vomiting unless told to do so by the poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

If in eyes
• Hold eye open and rinse slowly and gently with water for 15 – 20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor immediately for treatment advice.

If on skin or clothing
• Take off contaminated clothing.
• Rinse skin immediately with plenty of soap and water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If inhaled
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
• Call a poison control center or doctor for treatment advice.

NOTE TO PHYSICIAN

• Early signs of intoxication include mydriasis (dilated pupils), ataxia (unsteadiness), and muscle tremors. Toxicity follows accidental ingestion of Abamectin 0.15 EC and can be minimized by promptly administering activated charcoal.
• If toxicity from exposure has progressed to cause severe vomiting, the extent of resultant fluid and electrolyte imbalance should be gauged. Appropriate supportive parental fluid replacement therapy should be given, along with other required supportive measures (such as maintenance of blood pressure levels and respiratory functionality) as indicated by clinical signs, symptoms, and measurements.
• In severe cases, observations should continue for at least several days until clinical condition is stable and normal. Since abamectin is believed to enhance GABA activity in animals, it is probably wise to avoid drugs that enhance GABA activity (barbiturates, benzodiazepines, valproic acid) in patients with potentially toxic abamectin exposure.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

For 24-Hour Medical Emergency Assistance • Call 1-800-308-5391

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: May be fatal if swallowed. Causes substantial but temporary eye injury. Do not get in eyes. Harmful if absorbed through skin or inhaled. Avoid contact with skin or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are listed below. For more options, follow the instructions for Category B on an EPA chemical-resistance category selection chart.

Applicators and other handlers must wear:
• Coveralls over short-sleeved shirt and short pants.
• Chemical-resistant gloves, such as barrier laminate or butyl rubber ≥ 14 mils.
• Chemical resistant footware plus socks.
• Protective eyewear.
• Chemical-resistant headgear for overhead exposure.
• Chemical-resistant apron when cleaning equipment, mixing, or loading.
• For shadehouse and greenhouse uses, applicators and other handlers must wear a dust/mist filtering respirator (MSHA/NIOSH approval prefix number TC-21C, or a NIOSH-approved respirator with any R, P or HE filter).

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate. Do not reuse them. Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

Users Should:
• Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
• Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

NOTICE: This product contains a chemical (N-methyl pyrrolidone) known to the state of California to cause birth defects or other reproductive harm.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and wildlife. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash water or rinsate. This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

Use of this product may pose a risk to threatened and endangered species of fish, amphibians, crustaceans (including fresh water shrimp), and insects. All use of this product in the state of California should comply with the recommendations of the California Endangered Species Project. Before using this product in California, consult with your county agriculture commissioner to determine use limitations that apply in your area.

PHYSICAL OR CHEMICAL HAZARDS

Do not use or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Do not apply Abamectin 0.15 EC through any type of irrigation system. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.
Abamectin 0.15 EC

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.

Personal Protective Equipment (PPE)
PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:
- Coveralls over short-sleeved shirt and short pants
- Chemical-resistant gloves, such as barrier laminate or butyl rubber ≥ 14 mils.
- Chemical-resistant footwear plus socks
- Protective eyewear
- Chemical-resistant headgear for overhead exposure

For Use on Greenhouse-, Shadehouse-, and Field-Grown Ornamentals, Foliage Plants, Christmas Trees, and other Woody Ornamentals.

Abamectin 0.15 EC is an emulsifiable concentrate containing 0.15 lb. abamectin per gallon. When mixed with water according to the directions for use, Abamectin 0.15 EC will control mites and leafminers, and suppress thrips, aphids, and whiteflies on the following ornamental plants: Greenhouse-, shadehouse- and field-grown ornamentals; foliage plants; Christmas trees and other woody ornamentals.

To control mites, apply Abamectin 0.15 EC when mites initially appear, then repeat as needed to maintain control. To control leafminers, apply Abamectin 0.15 EC to ornamental plants that are hosts of pests on this label and increase the frequency of applications as needed to maintain control.

To suppress whiteflies, thrips, and aphids, apply Abamectin 0.15 EC when the young/immature stages of these pests are first seen, then repeat once per week for 2-3 weeks. Then rotate to other registered insecticides having different modes of action; avoiding use of the same product on successive generations; and using labeled rates at specified spray intervals. Management may include but are not limited to the following: use of various cultural practices; nonchemical alternatives (such as beneficial arthropods); and using labeled rates at specified spray intervals.

Resistant Management
To minimize potential development of pest resistance to abamectin, use of resistance management strategies is imperative, especially when applying Abamectin 0.15 EC to ornamental plants that are hosts of pests on this label that have multiple generations per crop or per year. Examples of resistance management may include but are not limited to the following: use of various cultural practices; nonchemical alternatives (such as beneficial arthropods); rotating susceptible and nonsusceptible plants; rotating pesticides with different modes of action; avoiding use of the same product on successive pest generations; and using labeled rates at specified spray intervals.

For managing susceptibility in Liriomyza leafminers, apply Abamectin 0.15 EC no more than three times, then apply a registered alternative product with a different mode of action for no more than three times before rotating back to Abamectin 0.15 EC or another alternative product. Product rotation intervals should be based on the generation time of Liriomyza leafminers to

NON-AGRICULTURAL USE REQUIREMENTS
The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Do not reenter treated areas until sprays have dried.

For greenhouse-, shadehouse-, and field-grown ornamentals, foliage plants, Christmas trees, and other woody ornamentals.

Abamectin 0.15 EC has been treated, such as plants, soil, or water is:

Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:
- Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.
- Personal Protective Equipment (PPE)
- PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:
  - Coveralls over short-sleeved shirt and short pants
  - Chemical-resistant gloves, such as barrier laminate or butyl rubber ≥ 14 mils.
  - Chemical-resistant footwear plus socks
  - Protective eyewear
  - Chemical-resistant headgear for overhead exposure

Use Restrictions
- Do not apply by air.
- Do not apply Abamectin 0.15 EC for suppressing thrips, whiteflies and aphids on gerbera, chrysanthemums, and roses, which are primary hosts of Liriomyza leafminers and mites controlled by Abamectin 0.15 EC. Additional applications of Abamectin 0.15 EC on these plants will increase the selection pressure on mites and Liriomyza leafminers, which could produce greater pest tolerance (resistance) to Abamectin 0.15 EC.
- Do not use Abamectin 0.15 EC in citrus nurseries.
- Do not use Abamectin 0.15 EC on ferns or Shasta Daisy, since phytotoxicity may occur on certain species of ferns (e.g., Adiantum spp.) and Shasta Daisy (L. eucanthemum spp.).
- Do not apply through any type of irrigation system.

Abamectin 0.15 EC is non-phytotoxic on a wide range of ornamental plants. However, since all combinations or sequences of pesticide sprays including surfactants and adjuvants have not been tested, it is recommended that a small area be sprayed first to make certain that no phytotoxicity occurs.

Resistance Management
To manage potential development of pest resistance to abamectin, use of resistance management strategies is imperative, especially when applying Abamectin 0.15 EC to ornamental plants that are hosts of pests on this label that have multiple generations per crop or per year. Examples of resistance management may include but are not limited to the following: use of various cultural practices; nonchemical alternatives (such as beneficial arthropods); rotating susceptible and nonsusceptible plants; rotating pesticides with different modes of action; avoiding use of the same product on successive pest generations; and using labeled rates at specified spray intervals.

• Do not apply Abamectin 0.15 EC to ornamental plants that are hosts of pests on this label that have multiple generations per crop or per year. Examples of resistance management may include but are not limited to the following: use of various cultural practices; nonchemical alternatives (such as beneficial arthropods); rotating susceptible and nonsusceptible plants; rotating pesticides with different modes of action; avoiding use of the same product on successive pest generations; and using labeled rates at specified spray intervals.

For managing susceptibility in Liriomyza leafminers, apply Abamectin 0.15 EC no more than three times, then apply a registered alternative product with a different mode of action for no more than three times before rotating back to Abamectin 0.15 EC or another alternative product. Product rotation intervals should be based on the generation time of Liriomyza leafminers to

Resistant Management
To minimize potential development of pest resistance to abamectin, use of resistance management strategies is imperative, especially when applying Abamectin 0.15 EC to ornamental plants that are hosts of pests on this label that have multiple generations per crop or per year. Examples of resistance management may include but are not limited to the following: use of various cultural practices; nonchemical alternatives (such as beneficial arthropods); rotating susceptible and nonsusceptible plants; rotating pesticides with different modes of action; avoiding use of the same product on successive pest generations; and using labeled rates at specified spray intervals.

Consult your State Cooperative Extension Service to obtain additional information regarding the implementation of these or other resistance management strategies.

For managing susceptibility in Liriomyza leafminers, apply Abamectin 0.15 EC no more than three times, then apply a registered alternative product with a different mode of action for no more than three times before rotating back to Abamectin 0.15 EC or another alternative product. Product rotation intervals should be based on the generation time of Liriomyza leafminers to
Avoid applying Abamectin 0.15 EC to successive generations.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container.

**Pesticide Storage:** Store in a tightly closed container in a cool, dry place.

**Pesticide Disposal:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**Container Disposal:** Triple rinse (or equivalent) and dispose of in an incinerator or landfill approved for pesticide containers.

**Spills:** For minor spills, leaks, etc., follow all precautions indicated on this label and clean up immediately. Take special care to avoid contamination of equipment and facilities during cleanup procedures and disposal of wastes.

In the event of a major spill, fire, or other emergency, call 1-800-424-9300.

**IMPORTANT INFORMATION—READ BEFORE USING PRODUCT**

**IMPORTANT:** Read the information below before using this product. If the terms are not acceptable, you should return the unopened product container immediately for a complete refund.

**WARRANTY LIMITATIONS AND DISCLAIMER**

Upon purchase or use of this product, purchaser and user agree to the following terms:

**Warranty:** FarmSaver.com, LLC, (the Company) warrants that this product conforms to the chemical description on the label in all material respects and is reasonably fit for the purpose referred to in the directions for use, subject to the exceptions noted below, which are beyond the Company’s control. The Company makes no other representation or warranty, express or implied, concerning the product, including no implied warranty of merchantability or fitness for a particular purpose; no such warranty shall be implied by law, and no agent or representative is authorized to make any such warranty on the Company’s behalf.

**Terms of Sale:** The Company’s directions for use of this product should be followed carefully. It is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, and the manner of use or application (including failure to adhere to label directions), all of which are beyond the Company’s control. All such risks are assumed by the user.

**Limitation of Liability:** The exclusive remedy against the Company for any cause of action relating to the handling or use of this product is a claim for damages, and in no event shall damages or any other recovery of any kind exceed the price of the product which caused the alleged loss, damage, injury or other claim. Under no circumstances shall the Company be liable for any special, indirect incidental or consequential damages of any kind, including loss of profits or income, and any such claims are hereby waived. Some states do not allow the exclusion or limitation of incidental or consequential damages.

The Company and the seller offer this product, and the purchaser and user accept this product, subject to the foregoing warranty, terms of sale and limitation of liability, which may be varied or modified only by an agreement in writing signed on behalf of the Company by an authorized representative.
