

Inconspicuous for humans, attractive to rodents.

- Quick-to-service design increases efficiency
- Cooler internal temperature reduces bait melt
- Lighter color blends well against concrete or other building materials
- "See the exit before entry" design lures rodents

AEGIS[®]-RP

Gray Bait Station

Aegis-RP Gray Bait Station — advanced rodent control technology in a new industrial-friendly design.

The introduction of a gray Aegis[®]-RP option means the industry's leading bait station comes in a package that's easy to service, blends better with surroundings and offers a cool lure to rodents.

Versatile—Accommodates bait, glue boards or traps.

Quick—Universal key gets you in and out fast.

Convenient—Lid opens away from wall for faster service.

Flexible—Allows for horizontal placement or vertical mounting.

- Exclusive quick-to-service locking system offers unmatched opening speed, so you can service each station quicker
- Proprietary design permits horizontal placement or vertical mounting for tight or wet areas
- Lid opens away from the wall for faster servicing
- Vertical and horizontal bait rods securely anchor rodenticides in place, making it easier for the rodent to consume and you to service
- Knockout anchor points provide flexible securing options
- Rounded interior corners result in easy and fast station clean out
- Strong mechanical hinges secure lid and operate down to -20 degrees for long service life
- Drain holes keep bait drier, maintaining palatability
- Traps easily fit within station, especially beneficial for audited/sensitive accounts
- Private label personalization and barcoding available

See how cool the gray station really is. Call **888-331-7900** or visit www.liphatech.com.
