

Alude™

Proven Control Against the Toughest Diseases.

As a systemic fungicide, Alude™ provides effective control of various plant diseases including black spot, scab and downy mildew. Alude is a proven performer against Phytophthora and Pythium associated with stem and canker blight. Plus, Alude offers multiple application method options and is tank-mix compatible with many pesticides.

MULTIPLE POINTS OF DEFENSE

- Multi-site mode of action
- True systemic mobility in the plant, moving both up and down in the plant's conductive tissue
- Enhances plant's natural defense mechanisms
- Decreases plant stress

MIXING AND APPLICATION OPTIONS

- Tank-mix compatible with most pesticides
- Full chemigation label

Alude™

KEY USES

Annual and perennial flowers
 Bedding plants
 Cool- and warm-season turfgrasses
 Deciduous and evergreen trees and shrubs
 Foliage plants
 Golf courses
 Groundcovers
 Landscape

KEY DISEASES CONTROLLED

(See product label for complete list)

Bacterial blight
 Downy mildew
 Fire blight
Phytophthora spp.
Pythium spp.

USE SUMMARY

TURF

Use Alude™ for the effective control of Pythium and damping-off diseases of turf grasses on golf courses, parks, commercial landscapes, commercial turf production and sod farms. When conditions favor disease, begin preventive applications and repeat at indicated intervals per label. Use higher rate of application when disease pressure is severe.

LANDSCAPE, GOLF COURSE, NURSERY, FORESTRY AND PARK APPLICATIONS*

Use Alude for effective control of Phytophthora and Pythium diseases associated with stem and canker blight (sudden oak death, Phytophthora ramorum), beech decline and general tree decline syndromes in landscapes, nurseries, golf courses, forests and parks. Apply Alude to plants such as, but not limited to, beech, cedar, chestnut, crabapple, dogwood, elm, fir, hawthorn, juniper, linden, monterey pine, oaks (coastal, live, shreve, black, canyon), ornamental pear, pyracantha, sweet birch, sweet gum, white pine, white cedar and willow.

Make applications before disease development and in conjunction with good cultural management practices. Use higher rate of application when disease pressure is severe. Do not exceed application rates or apply more frequently than stated on label or plant injury may occur. Do not apply to plants that are heat or moisture stressed. Do not apply to plants that are in a state of dormancy. Do not exceed spray intervals or label rates in order to avoid plant injury.

GRASS GROWN FOR SEED PRODUCTION*

Use Alude for effective control of damping-off and root rot diseases in turfgrasses such as, but not limited to, bermuda, fescue, bent, blue, rye, zoysia, buffalo and poa annua.

**Not labeled for use in California*

See label for complete directions for use.
