Pest Control Testimonials

We have been using Atrix HEPA Vacuums for years to combat various infestations ranging from cockroaches to live bed bugs and their eggs. Atrix vacuums are an indispensable tool in your IPM arsenal. They are easy to use, transport and have various options that can easily assist any Pest Management Professional in assisting their customers. This piece of equipment is a must have in combating any infestation you may be facing, and our customers also greatly appreciate the extra service it provides.

Sincerely,

Peter Stieglmayr

Operations Manager / Green Earth Pest Control

The Omega Green Supreme IPM has been a great asset to limiting our use of pesticides and looking for a more eco friendly way of doing pest control.

Bryan B. Levengood / Luvin'Bugs Termite & Pest LLC

I want to take this time to tell you a little bit about Rose Pest Solution's use of your companies IPM vacuums. We searched high and low to find an IPM vacuum that actually was an IPM vacuum. There are many brands on the market that claim to be IPM vacuums but are just vacuums with an IPM label attached to them. Atrix International's IPM vacuums are the best I have found. They add a new level of detail that other vacuums lack. They are easier to use when we are crawling around the floor ridding our customers of unwanted pests. It is very obvious that the engineers put a great deal of thought into this product. You are able to move from one area to another easily and you get the power you need to find those hidden critters. Thank you for the best IPM vacuum on the market and the professional level of service that Atrix provides.

John S. Forbes

Director of Residential Services / Rose Pest Solutions

Poulin's has been using the Omega Green Supreme vacuums for several years now. We primarily use the vacuums as part of our Bed Bug program. We have been extremely pleased with how the vacuum works. I would recommend this vacuum to anyone considering one.

**Yours truly,
Lincoln Poulin**

VP, Technical Operations / Poulin's Pest Control

I want to take this opportunity to let you know how pleased our technicians are with your Express Plus IPM Vacuum unit. We have been using these vacuums in our branch offices in Canada for the past few years, and have been very happy with their performance and durability.

We follow strict IPM practices when performing our pest management services, which is especially important in

controlling cockroach and bed bug infestations, and these vacuums have proven to be an important tool for us.

I have also seen the Omega GREEN Supreme IPM and the backpack vacuums recently, and look forward to adding them to our "tool kit" as well.

Thanks for the tremendous support, Jeff.

**Best Regards,
Bill Melville**
