

“We have been rebuilding the greens over the years and the newer greens were experiencing fairy ring. We tried different products and methods to get rid of it, but it was when we started using Bayleton for dollar spot and brown patch that I noticed we didn’t have fairy ring anymore. Bayleton also kept earlier diseases out of the greens.”

Cliff Dipman, Manhattan Country Club, Manhattan, KS

Turf Disease	Bayleton® 50 WSP Use Rate (oz per 1,000 ft ²)	
	Preventive	Curative
Dollar spot	0.25* - 0.5	1.0
Brown patch, Copper spot, Corticium, Red thread, Powdery mildew, Rusts	0.5	1.0
Anthrachnose	1.0	1.0
Southern blight	0.5 - 2.0	2.0
Gray leaf spot	0.5 - 1.0	
Bermudagrass decline, Take-all patch*	1.0 - 2.0	2.0
Gray snow mold/Typhula blight*	2.0	
Fusarium blight, Summer patch, Pink snow, Mold/Fusarium patch*, Large patch of Zoysia	1.0 - 2.0	
Stripe smut	1.0 - 2.0	
Ornamental disease**	5.5 oz in 275 to 550 gallons of water and apply as a full coverage foliage spray to the point of drip as needed	

* Except California ** Except as noted by specific ornamental diseases

WHAT IT IS.

A systemic fungicide for control of turf and ornamental diseases.

WHAT IT DOES.

Prevents and controls many turf and ornamental diseases caused by fungi, including dollar spot, brown patch, fairy ring and anthracnose. Ideal for golf courses.

OTHER BAYER BRANDS.

Bayleton fungicide is an excellent foundation tank mix partner.

WHY IT BEATS THE COMPETITION.

Bayleton is a proven fungicide for turf and ornamental disease protection with long lasting residual control. It’s easy to use and cost effective.

HOW IT MAKES YOUR JOB EASIER.

Bayleton fungicide offers flexibility in use rates and application intervals to fit your specific needs. The pre-measured water soluble packets make it easy to use in convenient mini drum or case package sizes.

RELAX. YOU’RE BACKED BY BAYER.

Training. Troubleshooting. Innovating. Count on us to stand behind you now and for years to come. Get science and support at BackedByBayer.com or 1-800-331-2867.

BAYLETON®

THE SCIENCE OF BAYLETON® FUNGICIDE.

Bayleton® is a systemic (acropetal penetrant) fungicide, and is absorbed by foliage and roots. Bayleton makes an easy fight out of turf and ornamental disease problems due to its broad spectrum activity and residual control.

Broad spectrum control:

- Anthracnose
- Bermudagrass decline
- Brown patch/Rhizoctonia blight
- Copper spot
- Red thread
- Dollar spot
- Fusarium blight
- Gray snow mold/Typhula blight
- Powdery mildew
- Pink snow mold/Fusarium patch
- Rusts
- Southern blight
- Stripe smut
- Summer patch
- Take-all patch
- Zoysia patch/Large brown patch

What Bayleton fungicide does best:

- Unsurpassed dollar spot control
- Broad spectrum disease control
- 14-28 day residual
- Ideal for golf courses and many ornamental diseases
- Convenient pre-measured water soluble packets
- Available in mini drum or case package sizes

Frequently asked questions.

- >Q What's the best way to use Bayleton fungicide in my dollar spot management program?
- >A Preventive: Apply 0.25 to 0.50 oz of Bayleton per 1,000 ft² for preventive dollar spot treatment. The length of residual control is dependent on many factors including use rate, disease pressure, application intervals and susceptibility of the turf being treated.
- Curative: Apply 1 oz of Bayleton per 1,000 ft² for curative dollar spot treatment.

THE SCIENCE OF YOUR PROFESSION.

Every ounce of Bayleton is Backed by Bayer, and all the science and support you need to get the job done right. That's what you should expect from an industry leader.

Our staff is your staff.

No one invests as much in product development as Bayer. Our scientists' expertise in chemistry and formulation technology is unrivalled around the world.
