

# HOLOGRAPHIC FLASH TAPE

## INSTALLATION INSTRUCTIONS

Thank you for purchasing the Bird•B•Gone® Holographic Flash Tape. For best results please read these instructions before use and retain them for future reference.

Bird•B•Gone® Holographic Flash Tape is ideal for scaring pest birds away from fruit trees, gardens, vines, pool areas, patios, gazebos, overhangs, boats and more! The non-sticky tape easily attaches to branches, vines, plants, trellises, sprinkler risers, or other elevated structures.

## INSTRUCTIONS

1. Cut Holographic Flash Tape into 2' to 3' lengths.
2. For each length, tie one end of Holographic Flash Tape to tree branch, boat railing, etc. Leave at least 10" of Holographic Flash Tape untied allowing it to flutter in the breeze.

**Fruit Trees:** For maximum protection of trees, hang Holographic Flash Tape from the perimeter branches.

**Structures:** To protect structures, hang Flash Tape above problem areas such as eaves, entrance ways, porches, railings, and more.

**Lawns & Gardens:** Hang Holographic Flash Tape from 3'-4' stakes, placing each stake 10' to 20' apart. Holographic Flash Tape is a great way to deter deer and geese!

**Boat and Boat Docks:** Tie Holographic Flash Tape to boat railings, dock rails or to any upright object near where birds are a problem.
