

Spray Tank Cleaner  
Commercial & Farm Use

# BLAZER

- Cleans Equipment
- Avoid Crop Injury
- Pink Indicator

**CAUTION:**  
**KEEP OUT OF REACH OF CHILDREN**  
See back panel for additional Precautionary Statements First Aid.  
**NET CONTENTS 16 FL OZ (473.2 ml)**

Ingredients:  
Proprietary blend of surfactants and cleaners.....100%

**BLAZER**  
Spray Tank Cleaner

**Product Usage:** Blazer is a commercial and farm use spray tank cleaner and neutralizer. Blazer can be used to clean fertilizer and pesticide residue from your equipment. Cleaning equipment with Blazer will minimize metal corrosion and deterioration of rubber parts. Using this product will also reduce the risk of crop damage due to contaminated tanks.

**Directions For Use:** For 100-300 gallon tanks use 16 ounces of Blazer with 50 gallons of water. Close boom valve, add 50 gallons of water to tank, turn on agitation and add 16 ounces of Blazer Spray Tank Cleaner. Open the bypass valve to circulate solution through valves, hoses, and pump. Use hand sprayer to wash inside and cover of the tank. Once the entire unit has been cleaned, open boom valve and empty the tank by spraying solution through boom and nozzles. Use proper disposal methods of spray solution. Repeat with just water until all pink color indicator is gone. A second water rinse is recommended when changing chemicals to lessen the chance of contamination.

**NOTE:** Special attention should be put on equipment parts that can absorb chemicals such as: hoses, pump, and hand boom packing. Allow Blazer Spray Tank Cleaner solution to remain in these parts overnight.

**Storage and Disposal:** Store above 55°F. Do not freeze. Store in original container only. Do not contaminate water, food or feed by storage or disposal.

**Precautionary Statements:** Can cause severe eye burns resulting in damage to the eyes. Wear eye protection when using. Users of concentrate should also wear chemical resistant gloves. **If in eyes:** Hold eye open and rinse slowly with water for 20 minutes. **If on skin:** Remove contaminated clothing. Rinse skin immediately with plenty of water. **If swallowed:** Rinse mouth immediately with water. Dilute any ingested material by drinking water or preferably milk. Do not induce vomiting. Call a poison control center or doctor for treatment advice.
