Mosquito Denial™

Prevents Mosquitoes
From Laying Eggs on Standing Water

Safe for use around pets

CAUTION:
KEEP OUT OF REACH OF CHILDREN

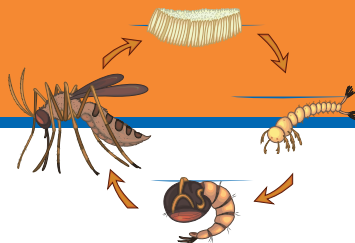

See back panel for additional information

Net Contents: 1 Gallon (3.78 Liters)

For Residential Use Only

Mosquito Denial™

Mosquitoes need water or they dehydrate and die. Female mosquitoes need water to deposit their eggs. Mosquitoes have the ability to land on the water where they are able to drink and lay eggs. Water tension allows mosquitoes to land on the surface of water and not sink. Mosquito Denial reduces that water tension making it more difficult for the mosquito to land and lay eggs or for existing eggs to remain at the surface.

Directions: Mix 1 part Mosquito Denial to 3 parts water in a pump sprayer. For example, to make 4 gallons of spray solution mix 1 gallon of Mosquito Denial with 3 gallons of water. 4 gallons of spray solution covers approximately 21,700 square feet or 1/2 acre. For smaller areas like flower beds and decorative ponds mix 8 ounces with 24 ounces of water and spray standing water. 32 ounces of spray solution treats approximately 1,356 square feet. Spray mixture during calm conditions on the surface of standing water. Spray all shallow areas weekly or as required. This product is for residential use and can be used anywhere water is allowed to stand such as ponds, flower beds and decorative water features. If dusty film appears on the water in less than a week, repeat treatment as needed.

Storage and Disposal

Store in original container, in secure place inaccessible to children and pets. Do not reuse or rinse empty container. Dispose of container in a safe manner in accordance with federal, state and local regulations. Do not use this product in a manner inconsistent with labeling. **Protect From Freezing**

In case of eye contact irrigate with water. Should any irritation occur, contact a physician for medical attention. Do not ingest.

This product has not been registered by the United States Environmental Protection Agency. Sanco Industries represents that this product qualifies for exemption from registration under the Federal Insecticide, Fungicide, and Rodenticide Act.

Active Ingredient:
Sodium Lauryl Sulfate.....8.3%

Inert Ingredient:
Water.....91.7%
Total.....100.0%
