CHELATED LIQUID IRON
FOR THE CORRECTION AND PREVENTION OF FOLIAGE YELLOTHING DUE TO IRON DEFICIENCY OF FLOWERS, SHRUBS, TREES, VEGETABLES AND LAWNS.

MINIMUM GUARANTEED ANALYSIS:
Soluble Iron as (Fe) ...................................... 5.00%
Chelated Iron as (Fe) ................................... 3.50%
Combined Sulfur as (S)................................ 3.40%

DERIVED FROM: Iron Sulfate, Iron Lignin Sulfonate.
Chelating agent is Lignin Sulfonate

Guaranteed by: Southern Agricultural Insecticides, Inc.
P.O. Box 218     Palmetto, Fl 34220

Brand Chelated Liquid Iron is intended for use in the correction and prevention of foliage yellowing due to iron deficiency of flowers, shrubs, trees, vegetables and lawns.

USE PRECAUTIONS
THIS PRODUCT WILL SEVERELY STAIN CONCRETE, MASONRY AND PAINTED SURFACES. Be extremely careful not to allow spray or runoff to contact with these materials. Do not mix with other fertilizers, fungicides or insecticides unless compatibility is known.

CAUTION:
KEEP OUT OF REACH OF CHILDREN.
Avoid contact with skin and eyes. Avoid breathing spray mist. Do not take internally.

STATEMENT OF PRACTICAL TREATMENT
IF SWALLOWED: Drink 2 glasses of water or milk and seek medical attention.
IF IN EYES: Flush eyes thoroughly with a large volume of water. If irritation persists seek medical attention.
IF ON SKIN: Rinse affected area with clear water and then wash thoroughly with soap and water.

DIRECTIONS FOR USE
Shake well before using.

FLOWERS, VEGETABLES, SHRUBS AND TREES
FOLIAGE APPLICATION:
Mix the material at the rate of 1 tablespoonful per gallon of water. Apply in a manner that will give thorough coverage to upper and lower surfaces of foliage. Use an amount sufficient to cause run-off of spray.

SOIL APPLICATION:
Use at the rate of 1 fluid ounce in at least 1 gallon of water per 100 sq. ft. For flower beds, treat the bed area. For shrubs and trees, treat the root area. This area usually extends out as far as the foliage.

LAWNS and TURF
Use 1 pint (16 fl. oz.) per 1,000 sq. ft. Apply in a sufficient volume of water to thoroughly wet the foliage and runoff in the root zone. Hose attached sprayers provide a convenient method to treat lawns.

Note: Iron deficiency in many plants is an indication of high pH or alkaline soil. If yellowing persists or returns rapidly after treatment, soil pH should be checked and adjusted if necessary.

Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions and precautions given herewith.
