

PRIME SOURCE

CHLOROTHALONIL 720 SELECT™

Resistance-free turf and ornamental fungicide

ACTIVE INGREDIENT

Chlorothalonil

% ACTIVE INGREDIENT

54%

FORMULATION

Flowable

CHEMICAL FAMILY

Organochlorine

BRAND ALTERNATIVE

Daconil Weather Stik®

MODE OF ACTION

Inhibits the synthesis of amino compounds and enzymes

SIGNAL WORD

Caution

PACKAGING

2 x 2.5 gal

LABELED USES

Golf Course

Ornamentals

Sod Farms

Chlorothalonil 720 Select™ is a broad spectrum turf and ornamental fungicide that features preventative disease protection with multi-site activity. As a result, Chlorothalonil 720 Select can be used repeatedly with little risk of resistance. Chlorothalonil 720 Select is an excellent choice for ongoing fungus protection in both cool and warm season golf turf.

- Broad spectrum, long-residual contact fungicide
- Labeled for use on cool and warm season turfgrasses
- Labeled for conifers and landscape ornamentals
- Natural adhesion to plant surface
- No resistance issues
- Easy to use liquid formulation

IMPORTANT:

CHLOROTHALONIL 720 SELECT™

Resistance-free turf and ornamental fungicide

Golf Course Applications

Apply Chlorothalonil 720 Select™ in 90 to 450 gallons of water per acre on golf course greens and tees, and 30 to 100 gallons of water per acre on fairways, lawns and other turfgrass. Apply with ground equipment only. Begin applications when conditions favor disease development and repeat applications as long as these conditions persist. Under severe disease conditions use the highest rate and shortest interval corresponding with the application schedule selected from the table below. Do not mow or irrigate after treatment until spray deposit on turfgrass is thoroughly dry. This product should always be used in conjunction with good turf management practices.

Diseases Controlled	Interval of Application	Golf Course Greens & Tees (Rate/1,000 sq. ft.)	Golf Course Fairways, Lawns & Other Turfgrass** (Rate per Acre)
Dollar Spot Brown Patch Leaf Spot, Melting Gray Leaf Spot	7- 14 Days	2 to 3.6 ounces (4.1 to 7.3 lbs. a.i./acre)	5 1/2 to 9 3/4 pints (4.1 to 7.3 lbs. a.i./acre)
Red Thread Anthracnose Copper Spot Stem Rust (bluegrass) Dichondra Leaf Spot	7 Days or 14 Days	3.6 ounces or 5 1/2 ounces (7.3 or 11.3 lbs. a.i./acre)	9 3/4 pints or 15 pints (7.3 or 11.3 lbs. a.i./acre)

**Does not include sodfarms

Ornamentals Applications

Apply Chlorothalonil 720 Select at a rate of 1 3/8 pints per 100 gallons of water unless other instructions are given in the label. Apply enough diluted spray per acre to provide thorough coverage of all plant parts that are intended to be protected from disease, generally ranging from 20 to 150 gallons per acre. Repeat applications at 7 to 14 day intervals until conditions are no longer favorable for disease. During periods when conditions favor severe disease incidence, generally cloudy or wet weather, apply this product at 7-day intervals. DO NOT apply more than a total of 36.4 lbs. chlorothalonil active ingredient per acre per growing season on field-grown ornamentals. Below is a list of some of the ornamental diseases controlled with Chlorothalonil 720 Select. Refer to the product label for a complete list and specific application instructions.
