

How to Use:

(based on an existing pH of 5.5)
The amount of Color Me Pink™ Garden Lime required will depend on your soil's pH level, so we recommend purchasing a soil tester before application. For amazing pink blooms on your hydrangeas, pH should be in the range of 6.5-7.0 (For a complete pH chart, please visit: EndlessSummerBlooms.com). Timing and results may vary based on soil type, temperature, and time of year. May require multiple applications in a season.

How Much to Use:

For New Plantings – 1 scoop (2 tbsp.) per plant. Mix in with the soil as you plant; water well.
Existing Plantings – 2 scoops (4 tbsp.) per plant. Staying away from the base of the plant, work into the top layer of soil around the root zone. Water well.
