

AspirEze™

Aspirin Gel

Indications:

AspirEze equine gel contains aspirin USP for the temporary relief of pain, fever and inflammation associated with the symptoms of wounds, cuts, abrasions and soft tissue pain in horses. Also good for conditions associated with arthritis and joint pain. It is apple flavored, microencapsulated and buffered.

Approved For Use On:

For veterinary use in horses only.

Product Advantages:

- For acute pain care; the temporary relief of pain, fever and inflammation associated with the symptoms of wounds, cuts, abrasions and soft tissue pain in horses.
- Microencapsulated to enhance palatability and for ease of administration by horse owner, buffered for safety
- Apple flavored
- Precise dosage - extensive clinical trials to determine aspirin's most effective dose for acute pain.
- Effective and easy to give on-the-go.
- Tested safe for use in pregnant mares and senior horses
- Can also be used for symptoms associated with arthritis and joint pain.
- Available OTC in a convenient 80cc dial-a-dose syringe

Active Ingredient:

Aspirin USP.....7500mg per 20cc

Instructions:

For adult horses of 1000lb; give 20cc twice daily or as needed at or before feeding. Adjust amount given depending on the size of the horse and the desired results. Do not give more than a total of 80cc in any 24 hour period. For symptoms associated with arthritis, give 7cc twice daily or as often as needed.
