

Iron-100

(Iron Hydrogenated Dextran Injection)

Indications:

Injectable Iron 100 mg is a sterile, injectable solution for the prevention and treatment of anemia due to iron deficiency in baby pigs.

Approved For Use On:

Swine

Active Ingredients:

Elemental iron 100 mg/mL

Product Advantages:

- Reduces losses due to iron deficiency
- Helps achieve optimum levels of iron necessary for good growth and overall good health
- Safe
- Quick absorption
- Good syringe-ability

Dosage and Administration:

For intramuscular injection only.

Prevention: 1 mL (100 mg iron) at 2 to 4 days of age.

Treatment: 1 mL (100 mg iron). Treatment may be repeated in 10 days.

NOTICE: Organic iron preparations injected intramuscularly into pigs beyond 4 weeks of age may cause staining of muscle tissue.

See product packaging for additional information.

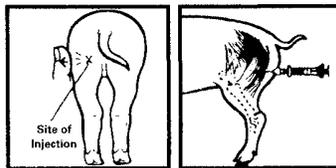

Packaging:

100 mL bottle, 12/case UPC# 7-45801-11030-4

IRON DEXTRAN-100

DIRECTIONS FOR USE: Disinfect rubber stopper of vial and injection site with a cotton ball moistened with rubbing alcohol or other suitable disinfectant. Use a small needle (20 gauge, 5/8 inch) and syringe that have been sterilized by boiling in water for 20 minutes. Injection should be made intramuscularly into the back of the ham (see diagram below). Apply tension to the skin at the injection site by pulling skin and fat downward with pressure from the thumb or fingers. Inject into the muscle to a depth of approximately 1/2 inch. Use a clean, sterile needle and syringe for each pig to avoid spreading infection.

PRECAUTIONS: If disease or abnormal condition is suspected, consult veterinarian before administration.

SIDE EFFECTS: Occasionally pigs may exhibit a reaction to iron injection, clinically characterized by prostration and muscular weakness. In extreme cases, death may result.

NOTICE: The intramuscular injection of organic iron preparations into pigs beyond 4 weeks of age may cause staining of muscle tissue.

HOW SUPPLIED: 100 mL multiple dose vials.
