

Lamb & Kid

COLOSTRUM ORAL GEL

with Probiotics and Vitamins

Description:

Lamb & Kid Colostrum Oral Gel is a nutritional supplement for newborn sheep and goats, which contains a source of live (viable) naturally occurring microorganisms, dried colostrum milk and vitamins.

The colostrum provided in Lamb & Kid Colostrum Gel supplies a source of maternal antibodies and protein. *Lactobacillus* organisms contained in this product assist in the establishment of beneficial microflora in the newborn. *L. acid* excreted by these organisms will influence pH reduction in the small intestine. This action removes the environment needed by certain coliform bacteria to proliferate and perhaps cause disease. The newborn receives a generous supply of highly absorbable, essential vitamins and trace minerals, which are necessary for the establishment of good health.

Ingredients:

Dried Bovine Colostrum, *Lactobacillus acidophilus* fermentation product dehydrated, *Lactobacillus casei* fermentation product dehydrated, *Bifidobacterium thermophilum* fermentation product dehydrated, *Enterococcus faecium* fermentation product dehydrated, Vitamin A supplement, Vitamin D₃ supplement, Vitamin E supplement, Vitamin B₁₂ supplement, FD & C yellow No. 5, Vegetable oil, Polysorbate 80, Mono and Diglycerides.

Guaranteed Minimum Analysis:

Vitamin A, min 10,000 IU/gm
Vitamin D₃, min 2,000 IU/gm
Vitamin E, min 5 IU/gm
Vitamin B₁₂, min 5 mcg/gm
Direct Fed Microbials 2.0 x 10⁸ CFU/gm

Store at room temperature.

Easy to Use

An easy to use gel formulation that provides a source of live (viable) naturally occurring microorganisms, dried colostrum milk and vitamins.

Approved For Use On:

Newborn sheep and goats

Benefits:

- Easy to use gel formulation that provides a source of live (viable) naturally occurring microorganisms, dried colostrum milk and vitamins
