

Devito™

with EnduraCap Technology

DEMAND LASTING CONTROL INDOORS AND OUTDOORS AGAINST 70+ INSECTS

Devito™ with EnduraCap Technology is a highly effective insecticide powered by lambda-cyhalothrin, a synthetic pyrethroid known for its ability to disrupt the nervous systems of insects. This versatile pest control product is a top choice for professionals due to its broad-spectrum efficacy against a wide range of indoor and outdoor perimeter pests, as well as in commercial lawns and landscapes. From common household intruders like ants, roaches, and bed bugs to outdoor nuisances such as mosquitoes, termites, ticks, and wasps, Devito with EnduraCap Technology provides comprehensive long-lasting pest control, reducing the need for frequent reapplication.

What makes this insecticide efficient is its robust EnduraCap formulation, delivering both swift knockdown and enduring pest control. With an outer layer for immediate control and an inner layer for long-lasting effects, it reduces the need for frequent reapplication. Choose Devito with EnduraCap Technology for efficient insect control and a quicker return to enjoying your pest-free surroundings.

KEY BENEFITS

- Rapid-release for effective knockdown
- Broad-spectrum pest activity
- UV-blocking technology for enhanced active ingredient protection
- Long-lasting residual control

KEY USES

- Around Buildings & Structures
- Commercial Lawns
- Both Indoors & Outdoors
- Turf
- Ornamental Trees & Shrubs

PRODUCT NOTES

EPA REGISTRATION NUMBER

91234-250

ACTIVE INGREDIENT

Lambda-cyhalothrin 9.7%

FORMULATION

Capsule Suspension

IRAC NUMBER

3A

SIGNAL WORD

Caution

PACKAGE SIZE

6 x 8 fl oz
8 x 1 qt
4 x 1 gal
30 gal

RESTRICTED USE

No

Refer to label for specific use restrictions.

GENERAL MIXING INSTRUCTIONS

Dilute Devito with EnduraCap Technology with water for application using hand-held or power-operated application equipment as a coarse spray for crack and crevice or spot and general surface (non-food/non-feed areas only) treatments. Application equipment that delivers low volume treatments may also be used to make crack and crevice or spot and general surface treatments. Fill applicator tank with the desired volume of water and add Devito with EnduraCap Technology. Close and shake before use in order to ensure proper mixing. Shake or reagituate applicator tank before use if application is interrupted. Mix only amount of treatment volume as required in the product label. Devito with EnduraCap Technology may be applied by using a paintbrush or other porous applicator attached to a handle as a general surface

PERIMETER BARRIER TREATMENTS

Apply a continual band of insecticide around building foundations and around windows, doors, service line entrances, eaves, vents, and other areas to reduce the potential for entry by crawling pests. Before application, remove debris and leaf litter from next to the foundation, cut back vegetation and branches that touch the foundation, and move or rake back rocks, deep mulch, or other potential pest harborage next to the foundation.

Apply the band up to 7 ft. wide around the structure (or according to state regulations governing commercial pest control) and upwards along the foundation to 2 ft. and around windows, doors, and roof overhangs. Apply as a coarse spray to thoroughly and uniformly wet the foundation and/or band area so that the insecticide will reach the soil or thatch level where pests may be active. Amount of concentrate is dependent upon pest species (see pest table and comments), infestation levels, and service interval desired.

RATE TABLE FOR PERIMETER BARRIER APPLICATIONS

RATE (FL OZ)	WATER ¹ (GAL)	AREA OF COVERAGE (SQ FT)
0.2	1 - 5	800 - 1600
0.4	1 - 5	800 - 1600
0.8	1 - 5	800 - 1600

¹Application volume may be greater than 5 gals./800-1600 sq. ft. if required under heavy vegetative or landscaping materials in order to obtain desired coverage.

Refer to product label for complete application and mixing instructions.
