## Operating Instructions

---

### Commander "Tri Jet" Drum Mount Fogger

1. Remove unit from shipping container.
2. Attach the 36" tubing to fluid intake inside of drum adapter.
3. Place a small amount of Teflon tape to drum adaptor threads.
4. Thread the unit to any size drum, which has a standard 2" national pipe thread opening.
5. Do not remove vent hole plug from bottom of unit.
6. Ensure the unit is in the **off** position and plug in to proper power supply.
7. Turn unit **on** and adjust fluid flow to desired flow.

**The unit must be disassembled and motor brushes replaced at 800 hours of run time to prevent motor damage!**
