4 x 1 gal.

DUO STICK SELECT™

ADJUVANT

Dual Action Surfactant Adjuvant

Duo Stick Select™ is a high quality blend of organosilicone surfactants (OSS) and methylated soybean oils (MSO). Designed for use with herbicides that call for the use of MSO and that does not exclude the use of OSS, Duo Stick Select provides superior coverage and penetration than MSO alone. Provides excellent coverage when using lower spray volumes less than 15 GPA.

- Increased efficacy of most pesticide applications
- Increased penetration of herbicides and fungicides
- Increased nutrient availability at the roots
- Increases the speed in which actives are available for uptake

IMPORTANT:
ALWAYS READ AND FOLLOW
LABEL INSTRUCTIONS.

PRIME SOURCE

DUO STICK SELECT™

ADJUVANT

General Information:

Duo Stick Select™ contains a distinct, high-quality combination of methylated soybean oil and organosilicone surfactant. The oil is a superior penetrant that aids certain pesticides in moving through the waxy cuticle of plants and leaves for greater efficiency. In addition, the organosilicone surfactant increases spreading and wetting of the applied solution so that the active moves to and through the plant quickly.

Directions for Use:

Duo Stick Select is designed for use with herbicides and may be used when the pesticide label calls for an MVO or MSO, but does not exclude the use of an organosilicone.

Application Rates:

Application	Per 100 Gal
Turf & Ornamental	16 to 48 ounces
Agriculture and Citrus	16 to 48 ounces
Rights of Way and Forestry Site	16 to 32 ounces
Aquatic (Surface)	16 to 32 ounces
Aquatic (Submerged)	20 to 40 ounces
