

INSECTICIDE

DURAFLEX ZC

CONTROLLED RELEASE INSECTICIDE

Advantages of using DURAFLEX ZC

- Combination Chemistry® contains an adulticide and two IGRs
- Breaks the life cycle of insect reproduction to control Fleas, Stored Product Pests, Cockroaches, Mosquitoes, Lone Star Ticks, and other listed insect pests.
- Fast-acting
- Low-odor
- For indoor/outdoor use

How it Works

DuraFlex ZC is the first microencapsulated concentrate that combines Bifenthrin with Novaluron and Pyriproxyfen. These 3 active ingredients provide 3 modes of action. Both IGRs create a synergistic effect resulting in early nymph control and death. By constructing capsules with a matrix of thinner and thicker capsule walls, microencapsulated technology allows immediate release of some capsules for an incredibly quick knockdown, while some capsules are made to diffuse active ingredient over a period of weeks, thus providing a long-lasting residual.

Target Pests

Fleas, Flies, Ants, Mosquitoes, Cockroaches, Stored Product Pests

Use Sites

Indoor/Outdoor, Homes, Commercial Buildings, Industrial Buildings, Recreational Areas, Ornamentals

Active Ingredients

- 3.95% Bifenthrin
- 1.3% Novaluron
- 1.3% Pyriproxyfen

Packaging

- 6 x 1 Quart
- 80 cases per pallet

Formulation

Capsule suspension

Always read and follow product label directions.
