

INTEGRATED PEST & INSECT MANAGEMENT AND MONITORING TOOL

The EZ Conceal™ is a low-profile insect station designed to fit securely where you need monitoring and management most, while concealing the insects from customers and unwanted views. Built for hard-to-reach spaces, it's ideal for discreet use in offices, commercial kitchens, and hotels, lying flat along floors, walls, or ceilings. Comes pre-assembled with double-sided foam tape for easy attachment. 100% American made.

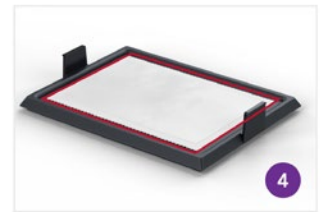

1
Low-profile, covered station can be placed flat on floors, walls, or ceilings.

2
Textured ramps help crawling insects like roaches enter with ease.

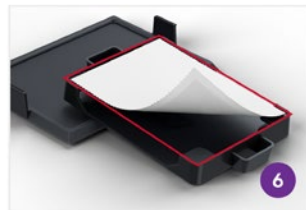

3
Left and right wall sections are closed, shielding the contents of the glue boards from the general public.

4
Glue board sinks into the base to create a deadfall for insects.

5
Glue board attaches to lid, making it easy to service after station is set in place.

6
Accommodates Catchmaster™ #72CRM glue board perforated for four placements and also fits perfectly into commercial mouse repeaters for dual use.

7
Comes pre-assembled with double-sided foam tape and acrylic adhesive to ensure secure mounting and long-lasting installation to a variety of surfaces, even in hard-to-reach spaces.
