

Eco Clear™

Pipe, Drain & Septic Cleaner

Eco Clear is a green product containing a specific, non-toxic microbe for the breakdown of materials in sewer and septic systems.

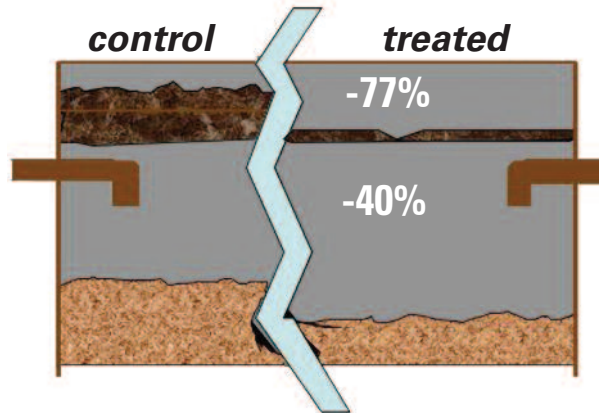

This simple, regular service makes plumbing maintenance easy and automatic. Eco Clear is several times more powerful than the leading retail products and is environmentally “green”.

Eco Clear’s granular material is packaged in easy-to-use flushable bags that dissolve in the pipes, helping to prevent clogs between the home and the sewer or septic tank. Eco Clear also reduces organics and solids in septic tank effluent, decreasing surface scum by an average of 77% and bottom solids up to 40%.

Benefits of Eco Clear:

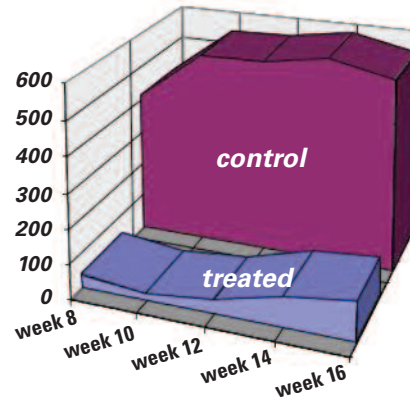

- For use in both sewer and septic systems
- Reduces pipe contamination
- Protects pipes, septic tanks and drain fields from organic and solids overload.
- Reduces odors & back-ups
- Treats the entire system
- Proactive vs. Reactive
- Safe and effective — “Beyond Green”

Eco Clear makes living with your septic system easier!

(Above) Eco Clear reduces surface scum an average of 77% and bottom solids up to 40%.

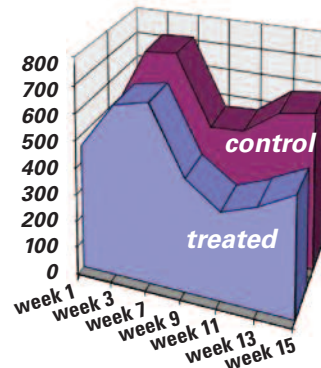

Effect on Effluent Chemical Oxygen Demand

Reduces organics.
COD reduced 52-96% vs. control

Eco Clear reduces organics (above) as well as surface scum and bottom solids (below) in effluent, protecting pipes and drain field from overload.

Effect on Effluent TSS

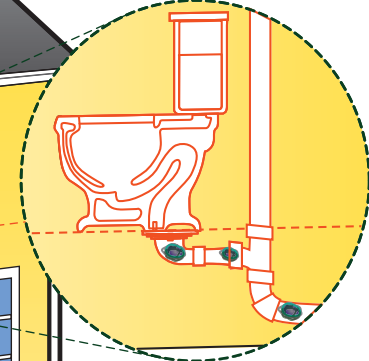

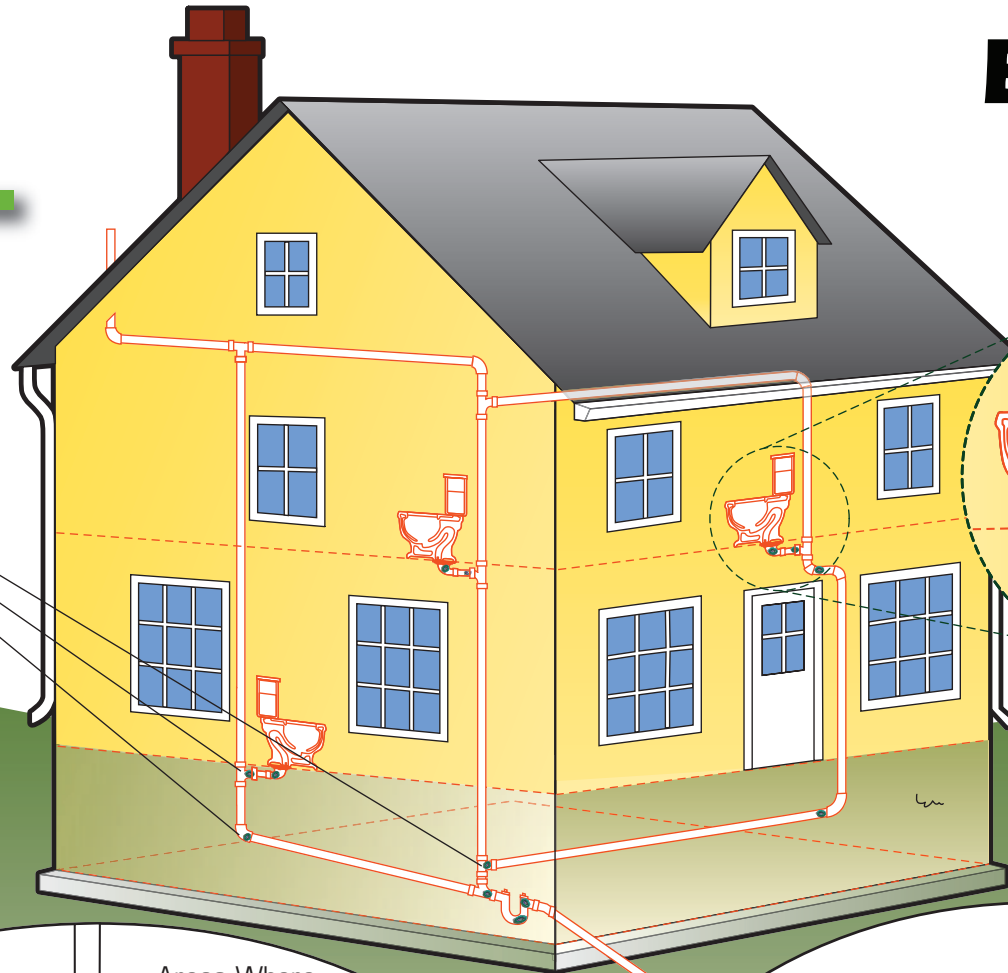

Reduces scum & solids.
Effluent TSS reduced by 36%.
