

Contains chlorfenapyr, the active ingredient used in Phantom® Termiticide-Insecticide.

INSECTICIDE

elusion™ 2 SC

NON-REPELLENT, INDOOR & OUTDOOR PEST CONTROL

Elusion™ 2 SC is a non-repellent insecticide that contains 21.45% of chlorfenapyr, the same active ingredient and percentage as Phantom® Termiticide-Insecticide. Approved for both indoor and outdoor use, Elusion 2 SC kills termites, ants, beetles, bedbugs, and cockroaches. This odorless, tasteless, and clear formulation is undetectable by target pests and metabolizes as an active insecticide only after it enters the host. This gives the insect enough time to transfer the insecticide to other members of its colony, eliminating infestations as if by magic. Take control of pests inside and outside of residential structures, food-handling establishments, commercial areas, and more with Elusion 2 SC.

KEY BENEFITS

- Non-repellent, powerful formulation
- EPA approved for both indoor and outdoor use
- Long-lasting residual

KEY USES

Indoor & Outdoor:

- Commercial sites
- Food-handling establishments
- Residential sites

PRODUCT NOTES

EPA REGISTRATION NUMBER
91234-238

ACTIVE INGREDIENT
Chlorfenapyr 21.45%

FORMULATION
Suspension Concentrate

IRAC NUMBER
13

SIGNAL WORD
Caution

PACKAGE SIZE
6 x 15 fl oz

RESTRICTED USE
No

Refer to label for specific use restrictions.

GENERAL INFORMATION

In order to maximize the termite potency of Elusion 2 SC, it should be applied in a manner to provide a continuous treated zone to prevent termites from attacking the wood to be protected.

The objective of soil treatments with Elusion 2 SC is to establish a treated zone (horizontal and/or vertical as needed) between the wood and other cellulose material in the structure and the termite population(s) in the soil for the purpose of protecting the structure from termite infestation and/or for controlling existing termite populations.

Treatment standards for subterranean termite control may vary due to state/local regulations, treatment procedures, soil types, construction practices and other factors. Follow all federal, state, and local regulations and treatment standards for protection of a structure from subterranean termites. Observe industry good management practices.

Where aerial infestations or above-ground nests are detected within the structure, supplemental treatments to control termites in the structure (see Above Ground Termite Infestations section of the product label), and/or structural repairs to deprive the termites of a moisture source may be needed.

For advice concerning current control practices, consult resources in structural pest control, state cooperative extension or regulatory agencies.

MIXING INSTRUCTIONS

DILUTION TABLE				
DESIRED DILUTION CONCENTRATION*	AMOUNT OF ELUSION 2 SC TO MAKE 100 GALLONS OF FINISHED DILUTION		AMOUNT OF ELUSION 2 SC TO MAKE 1 GALLON OF FINISHED DILUTION	
0.25%	150 fl oz (1.2 gal)	4.4 L	1.5 fl oz	44 ml
0.125%	75 fl oz	2.2 L	0.75 fl oz	22 ml

*Percentage weight of active ingredient to weight of spray dilution

FOR MIXING SMALL VOLUMES OF FINISHED DILUTION

For termite control operations requiring smaller volumes, use 1.5 fl oz of Elusion 2 SC per gallon of water to achieve a 0.25% concentration; use 0.75 fl oz of Elusion 2 SC per gallon of water to achieve a 0.125% concentration. Mix the termiticide use dilution in the following manner:

1. Fill hand-pressurized or power-operated application equipment with 1/2 to 3/4 of the required amount of water. Filling hose must be equipped with an anti-backflow device or water flow must include an air gap to protect against back siphoning.
2. Measure the required amount of Elusion 2 SC.
3. Add Elusion 2 SC to the sprayer and fill with the remainder of the water.
4. Close sprayer and agitate to insure proper suspension.
5. Re-agitate sprayer before use if spraying is interrupted.

Refer to product label for complete application and mixing instructions.

KEY INSECTS

Ants; acrobat, Argentine, carpenter, odorous house, pavement, pharaoh's, pyramid
 Bark scorpions
 Bedbugs
 Beetles; Asian lady, confused flour, darkling larva, saw-toothed grain
 Boxelder bugs
 Centipedes
 Cockroaches; American, Asian, brown-banded, German, Oriental, smokybrown
 European earwigs
 House crickets
 House flies
 Paper wasps*
 Pillbugs
 Silverfish
 Spiders; black widow, cellar

*Elusion SC is not a knockdown agent. (Refer to product label for complete list)
