

Evergreen, Tree & Shrub PLANT FOOD 4-6-4

GUARANTEED ANALYSIS

Total Nitrogen (N).....	4.0%
4.0% water insoluble nitrogen*	
Available Phosphate (P ₂ O ₅).....	6.0%
Soluble Potash (K ₂ O).....	4.0%

Derived from: blood meal, bone meal, poultry litter, sulfate of potash, and sulfate of potash-magnesia.

*4.0% slowly available nitrogen from blood meal, bone meal and poultry litter.

DIRECTIONS FOR USE:

Apply only as directed. Wash off any fertilizer which accidentally gets on foliage.
2 ½ cups of this product weighs approximately 1 pound.

Acid loving plants should be fed at least twice yearly, once in spring and again in late fall. They should also be fed when blooming or during periods of rapid green growth.

Azalea, Camellia, Gardenia, Rhododendron: These plants are shallow rooted and are best kept mulched and well watered in dry weather. When feeding, it is preferable to remove the mulch, apply fertilizer, then replace the mulch. For individual plants, apply ½ cup per 1 foot of plant height. Apply the fertilizer evenly under the branch spread, at least 6 inches away from the trunk. If the mulch is not removed, double the rate to 1 cup per 1 foot of plant height and water thoroughly after application.

Thank you for choosing our Garden Natural's Acid Loving Garden Fertilizer. This product will help encourage growth, beautiful foliage and blooms. Ideally suited for use on acid-loving plants such as Rhododendrons, Azaleas, Camellias, Gardenias, Evergreens, Hydrangeas, Holly, Dogwood and Magnolias.

WHAT THE NUMBERS MEAN?

Fertilizers are rated by three numbers, such as 3-5-4. The numbers tell what percentage of primary nutrients the fertilizer contains. The first number is the percentage of Nitrogen (N); the second number is the percentage of Available Phosphate (P₂O₅); the third number is the percentage of soluble Potash (K₂O).

When purchasing and using fertilizer, keep in mind that typically the first number (Nitrogen), emphasizes a green color and denser foliage. The middle number (Available Phosphate), emphasizes the development of flowers, fruits or vegetables. And the third number (Soluble Potash), emphasizes overall plant hardiness and its ability to withstand stress.

Evergreens, Dogwoods, Magnolia and other Acid-Loving Trees & Shrubs: Apply 1 cup per 1 foot of plant height. Apply the fertilizer evenly under the branch spread, at least 6 inches away from the trunk and water thoroughly.

Preparing Planting Beds: When preparing beds, apply 1 pound per 12 ½ sq. ft. (approximately 4 pounds per 50 sq.ft.). Rake or till into the top 4 to 6 inches of soil.

We hope you enjoy using our products and the results they produce. Remember to always follow directions carefully. Happy Gardening !

Information concerning the raw materials composing this product can be obtained by writing to the Guarantor listed on this container, and referring to the batch number found on this container.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>

Store in a dry place.

MANUFACTURER'S STATEMENT:

This product conforms to the Guaranteed Analysis on the label. Manufacturer's directions regarding the use of this product are based upon tests believed to be reliable. All statements made concerning this product apply only when used as directed under normal use conditions. This product is sold as is. Manufacturer makes no warranties, express or implied. In no event shall manufacturer be liable for special, indirect, incidental or consequential damages of any kind.

CAUTION: Keep this product out of reach of children. Keep from contact with eyes, cuts or sores. Wash hands after use. Not for human consumption.

NOTE: This product is sold by weight, not volume. Settling may occur during shipment.
