

1 Cubic Foot (26 Dry Quarts)

LIGHT WARRIOR® NATURAL SEED STARTER

The logo for Fox Farm Soil & Fertilizer Company. It features the words "FOX FARM" in a large, bold, yellow, stylized font with a black outline, set against a blue background. Below "FOX FARM" is a yellow banner with a black outline, containing the words "SOIL & FERTILIZER COMPANY" in a black, serif font. A small registered trademark symbol (®) is located to the right of the banner. The entire logo is positioned in the upper left corner of the advertisement.

FOX FARM
SOIL & FERTILIZER COMPANY
"Bring Your Plants to Life"

Light Warrior® *Agro-Ponic® Seed Starter is an all natural, pH balanced blend designed to promote optimal seed germination and enhance root development. Light Warrior® is packed with beneficial microbes that stimulate root growth and encourage nutrient uptake. We also include plenty of earthworm castings, one of nature's finest soil amendment. Use Light Warrior® for seed germination, cuttings, and new plant starts for both indoor and outdoor cultivation.

Ready for Planting

Plant directly into Light Warrior®. This Ultra Premium blend is pH adjusted to 6.3 to 6.8 to ensure optimum nutrient availability to the plants.

Light Warrior® contains powerful root stimulators called mycorrhizal fungi. **Mycorrhizae** occurs naturally in forest soils where the humus content is high and the soil is thriving with microbial life. Once in contact with the plant's root system, **mycorrhizae** goes to work right away colonizing directly on the roots. This activity dramatically expands both primary and secondary root development enabling the plant to take up more nutrients. The end result is enhanced fruit and flower production.

Light Warrior® also contains **Humic Acid**, a naturally occurring organic material which is extracted from Leonardite. Humic Acid is found in soils, coals, and peat, resulting from the decomposition of organic matter. Humic Acid may increase micro nutrient uptake.

Earthworm Castings are alive! – **Earthworm Castings** are known to have an extraordinary effect on plant life. They improve soil structure, which makes them one of the most enriched soil conditioners available. A healthy earthworm culture is bursting with life, full of regenerative organic matter that plants thrive on. That is why FoxFarm products are never steam sterilized.

— INGREDIENTS

Select sphagnum peat moss, horticultural perlite, earthworm castings, granite dust, 1.5% humic acid (derived from leonardite), mycorrhizal and bacterial inoculant, oyster shell (for pH adjustment).

Mycorrhizae Content	Propagules per cc
Glomus intraradices.....	028
Glomus aggregatum.....	028
Glomus mosseae.....	028
Glomus etunicatum.....	028
Laccaria bicolor.....	06
Laccaria laccata.....	5.6
Pisolithus tinctorius.....	414.4
Rhizopogon amyloliquefaciens.....	5.6
Rhizopogon fulvigleba.....	5.6
Rhizopogon luteolus.....	5.6
Rhizopogon villosulus.....	5.6
Scleroderma cepa.....	22.4
Scleroderma citrinum.....	22.4
Suillus granulatus.....	11.2

Bacterial Specifications	cfu per cc
Bacillus amyloliquefaciens.....	60
Bacillus licheniformis.....	60
Bacillus subtilis.....	60
Bacillus pumilis.....	60
Bacillus megaterium.....	60

STORAGE: Keep in a cool, dry place away from pets. Do not expose to excessive heat or direct sunlight.

EXPIRATION DATE: For maximum microbe activity, use within two (2) years from the manufacturer's stamped date.

How to Use

Seeds:
Plant seeds in Light Warrior® according to manufacturer's recommendations. Water thoroughly and place near a light source. For best results, maintain an ambient temperature of 68-75 degrees Fahrenheit. Begin feeding with Big Bloom™ Liquid Plant Food within 5 days. Once seeds are germinated, begin feeding with Grow Big® Liquid Plant Food. When sprouts are fully rooted, transplant from Light Warrior® to Ocean Forest® or Happy Frog® Potting Soil.

Cuttings and Plant Starts: Place cuttings or plant starts in Light Warrior®. Water thoroughly and place near a light source. Begin feeding with Big Bloom™ Liquid Plant Food within 5 days. During the second week of growth use Grow Big® Liquid Plant Food. Once plants are thoroughly rooted, transplant from Light Warrior® to Ocean Forest® or Happy Frog® Potting Soil.

Houseplants:
For an exceptionally light and well aerated blend, mix Light Warrior® 50/50 with Ocean Forest® or Happy Frog® Potting Soil. Feed houseplants regularly with Grow Big® Liquid Plant Food.

For more information about fertilization rates please reference our FoxFarm feeding schedule at www.foxfarmfertilizer.com.
