Feeding Directions

Enclosed scoop holds one ounce.

Feed H.B. 15™ Hoof Supplement at the following daily rates:

Adult Horses: 1 ounce per day

Foals, Weanlings, Ponies: ½ ounce per day

Pregnant & Nursing Mares: 2 ounces per day

Sprinkle the proper amount over feed or mix with the grain ration. Close container after each use. Store in a cool, dry place.

Proteins are one of the most important nutrients, vital to life and health. This product has been specially formulated to contain biotin and the amino acids lysine and methionine. Amino acids are the "building blocks" of the body and enable a horse to make the best possible use of the vegetable proteins present in hay and grains. Lysine and methionine are recognized as especially vital for horses for this reason. H.B. 15™ Hoof Supplement also contains Vitamin B₆, which aids in the metabolism of these amino acids.
