

Finale[®] XL F-VM

Herbicide

Fast, non-selective control with precision accuracy

Finale[®] XL F-VM herbicide is BASF's newest non-selective, contact herbicide formulation with enhanced active ingredient loading. It has pinpoint accuracy and delivers fast control of the toughest weeds at lower use rates than prior formulations.

It's the perfect tool for emerged annual and perennial grasses, brush, hardwood, conifer and broadleaf weeds, including terrestrial and riparian invasive and noxious weeds.

 **BASF**

We create chemistry

Faster Activity

Fast-acting knockdown of troublesome weeds

Precision Accuracy

Contact activity only affects what you spray with a spot treatment

Controls Toughest Weeds

Controls a broad spectrum of emerged annual and perennial grasses and broadleaf weeds

Glyphosate Alternative

Excellent alternative to glyphosate: faster results and lower A.I. per acre

Finale XL F-VM herbicide is a great alternative to glyphosate products. Contact activity allows for worry-free, precision edging and minimal off-target issues. Weed growth is stopped within hours-to-days of application with faster symptomology, particularly during cool weather.

The accuracy you want, the speed you need

- Better control of broadleaf weeds
- Rainfast in as little as 30 minutes
- Good control of Rubus
- Good hardwood control and conifer control; add Detail® herbicide for better performance
- Excellent tank mix partner with preemergent herbicides for residual control

Where to use Finale XL F-VM herbicide

- Private, public and military lands
- Uncultivated non-agricultural areas
- Uncultivated agricultural areas
- Non-crop producing industrial sites
- Natural areas
- Side trimming
- Site preparation for conifer
- Hardwood production areas
- Dormant roadside bermudagrass turf for weed control

FRAC Group	Active Ingredient (%)	Rate Range (% solution)	Rate Range	Formulation	Packaging	Top Weeds
10	glufosinate-ammonium 24.5%	0.4 to 1.25*	27 to 82 fl oz / A*	Soluble concentrate	2 x 2.5 Gal	Crabgrass, dandelion, clover, and plantain

*Finale XL F-VM herbicide's rate range is a function of the size of the weed; maximum rates are for large weeds and brush and perennial grasses. Maximum rate is 5.125 pints per acre. Add NIS and/or AMS for better control of perennial grasses, brush, and large weeds.

Always read and follow label directions.
