

Inhibits reinfestation by fleas for up to 7 months

For use on furniture, animal quarters, carpets, kennels, poultry houses

For indoor/outdoor use

Keep Out Of Reach Of Children CAUTION (See back panel for additional Precautionary Statements and First Aid) Net Contents 1 fl. oz.

ACTIVE INGREDIENT:

IF IN FYES:

2-[1-Methyl-2-(4-phenoxphenoxy) ethoxy] pyridine OTHER INGREDIENTS*:

*Contains petroleum distillate

EPA Reg. No. 53883-60-4 EPA Est. No. 4-NY-1 See attached booklet for Direction for Use

- ✓ Kills preadult larval fleas, including eggs for 7 months
- √ Flea eggs deposited on treated areas will not develop into adult fleas
- ✓ For control of fleas, & flying insects (such as mosquitoes and anats)
- ✓ For use on furniture, animal quarters, carpets. kennels, poultry houses
- √ For indoor/outdoor use

FIRST AID

 Call a poison control center or doctor immediately for treatment advice. SWALLOWED: Do not induce vomiting unless told to do so by a poison control center or doctor.

. Do not give any liquid to the person.

. Do not give anything by mouth to an unconscious person Hold eye open and rinse slowly and gently with water for 15-20 minutes.

· Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

· Call a poison control center or doctor for treatment advice.

IF ON SKIN OR . Take off contaminated clothing.

Rinse skin immediately with plenty of water for 15-20 minutes.

CLOTHING: · Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air.

 If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.

Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact SafetyCall® International (866) 897-8050 for emergency medical treatment information. NOTE TO PHYSICIAN: Contains petroleum distillate; vomiting may cause aspiration pneumonia.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Harmful if swallowed or absorbed through skin. Do not breathe vapors or spray mist. Avoid contact with skin or eyes. In case of contact, flush with plenty of water. Wash with soap and warm water after use. Obtain medical attention if irritation persists. Avoid contamination of food or feedstuffs.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and aquatic invertebrates. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning equipment or disposal of equipment washwaters.

Do not use or store near heat or open flame.

PHYSICAL OR CHEMICAL HAZARDS

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Storage and Spill Procedures: Store upright at room temperature. Avoid exposure to extreme temperatures. Store in a locked area out of reach of children and domestic animals. In case of spillage or leakages, soak up with an absorbent material such as sand, sawdust, earth, Fuller's earth, etc. Dispose of with chemical waste.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spilled bait, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for Guidance.

Container Disposal: If empty - Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. If recycling is not available then dispose of container in a sanitary landfill or, if allowed by State and local authorities, by burning. If burned, stay

If partly filled: Call your local solid waste agency for disposal instructions. Unless otherwise instructed, place in trash. Never pour unused product down the drain or on the ground.

— DIRECTIONS FOR USE ————

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling Precautions:

- For best results, follow directions for specific use areas
- Do not use this product in or on electrical
- equipment due to possibility of shock hazard Avoid excessive wetting of carpet, draperies
- and furniture Always test in an inconspicuous area prior to use as some natural and synthetic fibers may
- be adversely affected by any liquid product. Restrictions When used in hospital rooms, convalescent hospital rooms, and nursing home rooms
- patients should be removed prior to treatment Ventilate treated rooms thoroughly for two (2)
- hours after treatment. Do not return patients to treated room until after ventilation. READ ALL DIRECTIONS COMPLETELY

BEFORE USE

FLEA CONTROL

The active ingredient in this product is Pyriproxyfen an insect growth regulator. Insect growth hormones are naturally occurring in insects and this product prevents the adult flea from developing. These properties will gradually result in the reduction and eventually elimination of the flea population. Flea eggs and flea larvae that come into contact with

this product will also not develop into adult fleas

This product works for 7 months by inhibiting the development of the immature stages of the flea and preventing them from reaching the biting adult stage. This product does not work on adult fleas and flea pupae that already exist.

Note: If a high population of adult fleas are present, it may be necessary to use an adulticide. This product may also be combined with a flea

Application of this product prior to the flea season will aid in reducing developing populations. Apply to areas where pets and other animals are known to frequent and where previous infestations have been known to occur to prevent the emergence of adult fleas and also control stages of fleas that

don't resemble fleas INDOORS: Mix this product with water and apply with spray equipment such as any low pressure sprayer used for indoor applications. Before treatment, vacuum carpets, draperies and upholstered furniture. Dispose of Vacuum bag in

an outdoor trash receptacle

- Remove pets from area to be treated. After treatment, do not allow children and pets into treated areas until spray has dried

Spray Mixing: Prepare a diluted spray solution by adding 1 ounce per gallon of water. Partially fill the mixing container with water, add this product, agitate and fill to final volume. Do not allow spray mixture to stand overnight. Mix before each use

Use With an Adulticide Insecticide: For immediate relief of adult fleas, this product may be combined with an insecticide registered for adult control of fleas. This mixture will also inhibit the development of the immature stages of the flea for 7 months. Follow all precautions and use directions on both products. Use at the

application rate specified above

GENERAL SURFACE APPLICATION: Apply this product diluted spray at the rate of 1 gallon per 1.500 square feet of surface area. Treat all areas including carpets. furniture, pet sleeping areas and throw rugs making sure to spray underneath cushions

etc. Repeat treatment every 7 months. Note: Do not allow children or nets to contact treated surfaces until spray has

he applied to carnet

Use With a Carnet Shampoo: This product may be used with a liquid, non-heat extracting carpet shampoo application Following dilution instructions on carpet shampoo, add 1 fluid ounce of this product per gallon (7.8 ml/L) of diluted shampoo to Mix well and shampoo carpet as per instructions on the shampoo product label using approximately one gallon of diluted shampoo to treat 1,500 sq ft. (139 m2) Allow carpet to completely dry and vacuum thoroughly.

This product will control the development

of preadult fleas from becoming biting and

IN KENNELS AND DOGHOUSES

reproductive adult fleas. Make application with an adjustable hose-end sprayer, tank type sprayer or sprinkling can. Prepare a diluted spray solution adding 1 ounce per gallon of water and apply at a rate of 1 gallon diluted solution per 1,500 square feet of surface area. Apply to building, resting areas, walls, floor, animal bedding and run areas. Remove animals before spraying and do not return animals to treated areas until spray has dried completely. Pets and their bedding should also be treated with EPA registered flea and tick control products, flea or flea and tick collar, pet powder, pet spray, pet dip, pet shampoo, flea shampoo or flea and tick pet shampoo, in conjunction with this application as part of a complete flea control program to prevent the introduction of adult fleas. Repeat at 6 month intervals OUTDOORS: Apply this product dilution as a

spot treatment to areas where pets normally frequent including, but not limited to under trees ornamental plants and shrubs Application on soil surfaces will provide 21 days of IGR activity. If large populations of adult fleas exist, treat the lawn area with an EPA registered lawn treatment

product to kill adult fleas.

Spray Mixing: To prepare a diluted spray solution, mix 1.0 ounce in 5 to 15 gallons of water. depending on equipment used, to cover 1,000 square feet. Partially filling the sprayer with water. add this product, agitate and fill with water to the final volume. Agitate before each spray. Using a hose-end sprayer, tank type sprayer or sprinkling can, spray using a slow, even sweeping motion. making sure to cover surface areas where the pets normally frequent. One (1) tsp. per gallon will

- Note:
- Do not allow the spray mixture to stand overnight Caution should be taken to avoid spraying when wind conditions could create a mist to blow back

cover 333 square feet for spot treating pet resting

- Do not apply this product in or around bodies

areas. Repeat application in 21 days.

of water.

the introduction of adult fleas

 Avoid soaking young or flowering plants. Remove animals before spraying Do not allow animals or children to return to

treated areas until spray has dried completely. Pets and their bedding should also be treated with EPA registered flea and tick control products, flea or flea and tick collar, pet dust, pet spray, pet dip net shampoo, flea shampoo or flea and tick pet shampoo, in conjunction with this application as a part of a complete flea control program to prevent

ING INSECT PESTS (Such as Flies, Moths, Midges, Mosquitoes & Gnats.): General Surface Treatments:

CONTROL OF FLY-

For control of HOUSE FLIES, STABLE FLIES MOTHS MOSQUITOES NUISANCE FLIES (GNATS, MIDGES) and other similar flying pest insects such as those classified as Dipterous or Hymenopterous. In house flies, this product causes a decrease in the number and hatching of eggs laid by treated adults. Fly larvae (maggots) treated with this product cannot develop into normal adults. The use of this product will result in a reduction in adult fly populations after 3-4 weeks, at the time when previously hatched adult flies have died naturally. This product may be used for control of flying insect pests in on and around buildings as described under DIRECTIONS FOR USE. These areas include. but are not limited to residential commercial public, industrial and agricultural buildings. This product may be used to control nuisance flies. gnats, midges, and mosquitoes by application into moist breeding areas (potted plants, moist debris or litter) or into areas holding standing water such as gutters, drains, pools and fountains Note: • Do not apply directly to any natural bodies

of water such as ponds, lakes, streams, rivers, marshes notholes and estuaries

 If needed, repeat treatments with this product may be made 14 days after previous treatment. or if heavy rainfall occurs

trucks, railcars, ship cargo holds)

Treatments in Combination with an Adulticide: Use this product in alternation or in a tank mix combination with an adulticide insecticide for quick knockdown and more rapid control of adult flying insect pests. As an IPM strategy, combining or alternating this product with other types of chemicals, such as pyrethroid or organophosphate insecticides, can reduce or prevent the development of genetic resistance to these adulticide insecticides.

Tank Mixes: Make applications in accordance with those use precautions and label instructions that are consistent for each product. Prepare the tank mix using the recommended label rate of adulticide and this product by adding the adulticide first and making sure it is well mixed and in suspension, then adding the correct amount of this product according to the label instructions below. Treatments in. on and Around Livestock and Poultry Housing and Pet Kennels: This product may be used by nest control operators or livestock producers in livestock housing structures (including poultry houses) and pet kennels to control flying insecpests. Apply as a general surface, fogger/ULV or a crack and crevice application to areas where flying pests collect or breed. For surface applications, thoroughly wet floors, walls ceilings, doors, around windows, garbage and refuse areas. When used as directed, this product will not harm beneficial insects in animal litter or bedding, such as predatory wasps. Control will be enhanced when facilities are cleaned and interior applications are supplemented with

exterior perimeter treatments.

- · Treat birdcages or stock pens only after removal
- of animals. · Do not make interior applications of this product
- in areas of facility where animals are present. Allow treated areas to dry before allowing
- animals back in treated areas of facility. Do not contaminate or apply food or foodstuffs. water or watering equipment.

Treatments to Interior Areas and Surfaces: Use 1 fl. oz. of this product per gallon of water and apply to 1,500 square feet of surface area, or in sufficient volume to achieve adequate coverage. Treat all areas where flying insects may collect, rest or breed, including vertical walls, ceilings, pipes, conduit, stalls, stanchions, floors, and walkways, When this product is used alone, treatments can be extended to animal bedding, manure, and other potential areas where flying insects may breed. Treatments to Perimeter Areas and Surfaces: Use 1 fl. oz. of this product per gallon of water and apply to outside surfaces of buildings, porches, patios, garages and other areas where these pests have been seen or found. For perimeter control make a general surface application of 1 ounce of product diluted in water such as to cover 1.500 square feet, or in sufficient volume to achieve adequate coverage. To help prevent infestations of buildings by flying insects, treat soil, vegetation or other substrates in a band 6-10 feet wide adjacent to the building foundations, walls, around doors and windows, and overhead areas where these pests

are active and may find entrance or harborage

STORAGE & DISPOSAL

Do not contaminate water, food or feed by

storage or disposal. Storage and Spill Procedures: Store upright at room temperature. Avoid exposure to extreme temperatures. Store in a locked area out of reach of children and domestic animals. In case of spillage or leakages, soak up with an absorbent material such as sand, sawdust, earth, Fuller's earth, etc. Dispose

of with chemical waste.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spilled bait, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency. or the Hazardous Waste representative at the nearest EPA Regional Office for Guidance. Container Disposal: If empty - Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available. If recycling is not available: then dispose of container in a sanitary landfill or, if allowed by State and local authorities, by burning. If burned, stay out of smoke. If partly filled: Call your local solid waste agency for disposal instructions. Unless otherwise instructed, place in trash. Never pour unused product down the drain or on the ground.

 Call a poison control center or doctor immediately for SWALLOWED: treatment advice. Do not induce vomiting unless told to do so by a poison control center or Do not give any liquid to the person.
