

FOAM FRESH™

TRIPLE ACTION FOAM FRESH

1.

When you spray Foam Fresh onto a surface, the foaming action immediately encapsulates odor-causing molecules, reducing offensive odors.

2.

The offensive odor is replaced by the bold fresh scent of Foam Fresh. This fresh scent is most powerful when first sprayed, then it dissipates to a gentle fragrance.

3.

Finally, Foam Fresh attacks the organic matter that is the cause of the odor. Seven strains of microbes begin consuming the organic matter, and the microbes will double in population every 20 minutes until their food source is consumed.

THE MOST POWERFUL

BIO-REMEDIAL ODOR CONTROL FOAM

IS NOW AVAILABLE – SO SPRAY AWAY

Pest technicians are called to fix some pretty nasty problems, and lots of those situation also have significant odors. Now you can eliminate organic-based odors and organic buildup just as professionally as you kill the pests. Simply spray Foam Fresh directly onto the source of the odor and watch it go to work. The foam encapsulates the odor molecules, then its seven strains of microbes go to work consuming the organic matter. Use Foam Fresh to break down gunk in commercial kitchens, garbage receptacles, floor drains and sink drains. You can also use Foam Fresh to eliminate odors like urine, vomit and feces. And Foam Fresh can be sold to residential and commercial accounts.

RODENT & DEAD ANIMAL ODOR

Use Foam Fresh to eliminate odors from rodents and other dead animals. Simply spray the area after the carcasses have been removed and Foam Fresh will encapsulate the odor. Then its seven strains of microbes go to work consuming the organic matter that causes the odor.

BAT GUANO

When you encounter significant odor from bat guano in a customer's home, you can use Foam Fresh to give immediate relief. Once the clean-up is finished, spray the area again to eliminate odors and allow the microbes to consume the organic material causing the odor.

GARBAGE RECEPTACLES

Garbage cans represent a consistent problem area.

Keep this area clean by spraying Foam Fresh into the can, under the lid and on the ground around the can where any garbage may have spilled. Foam Fresh goes to work by first encapsulating the odor and then consuming the organic build-up.

Foam Fresh can be sold directly to consumers and is a great for recycling bins, drain odors and pet messes.

COMMERCIAL KITCHENS

Commercial kitchens are notorious for letting Fats, Oils & Grease (FOG) build up in drains. Food and grease spill on the floor and are washed down the drain. The accumulation of the food debris and FOG can cause serious issues. Spray Foam Fresh into drains on each visit. You can also sell a restaurant Foam Fresh for their own use. The foam releases seven strains of microbes that go to work consuming organic matter. Regular application helps keeps kitchens clean and drains running smoothly.

COMMERCIAL KITCHENS

On some days there is not time for a complete drain treatment. On those visits simply hit the drains with a shot of Foam Fresh. It reduces build-up and keeps the kitchen smelling fresh.

SODA DRAINS

Spray soda drains at the end of the night to eliminate drain odors and reduce syrup build-up.

SINKS AND DRAINS

Spray sinks and drains at the end of the night to eliminate drain odors and reduce organic build-up.

BIRD DROPPINGS

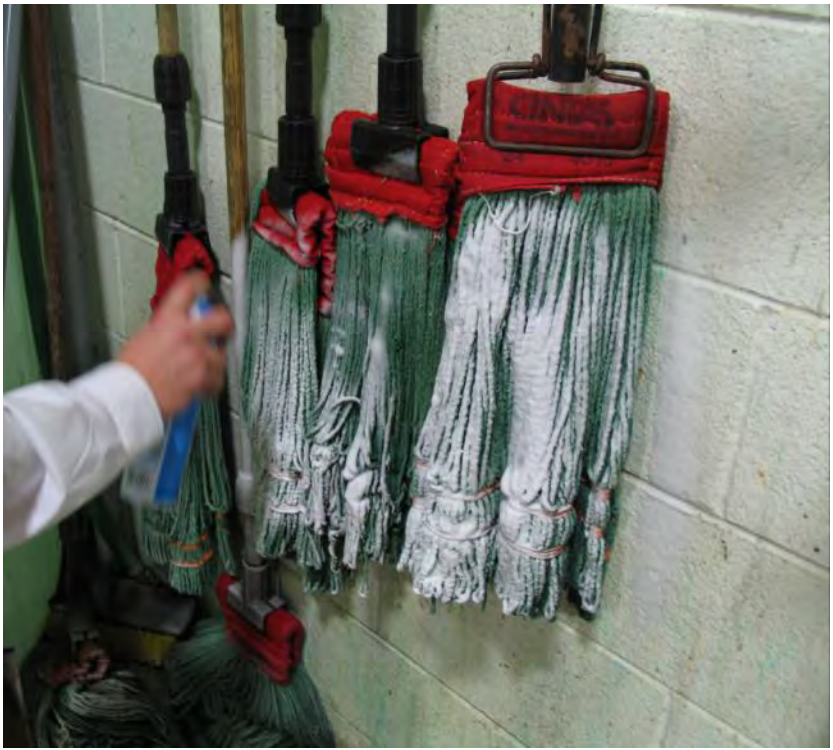

When you have to deal with the strong odor of bird droppings, use Foam Fresh to quickly knock down odors. After clean-up go back and spray the area again to eliminate odors and allow the microbes to consume the organic materials causing the odor.

FLOOR DRAINS

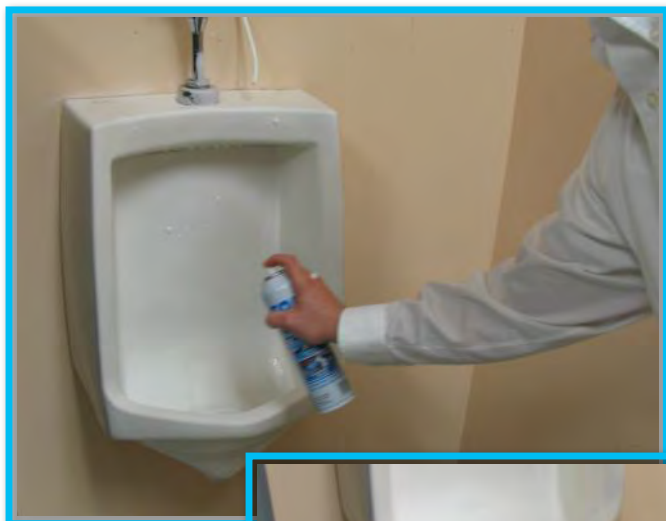

Use Foam Fresh for quick hits on floor drains between major cleanings. It will knock down odors and consume organic build-up in drains.

MOPS

Mops are a constant source of odor. When the mopping is finished, spray Fresh Foam all over the entire mop. This will eliminate that sour odor and break down the small food debris left in the mop.

URINALS

Urine odor can damage the reputation of any establishment. Just a quick spray of Foam Fresh at the end of the day will not only help eliminate the odor, but will also go to work consuming the source.

LOCKERS

Lockers can become a real source of odor when clothes, work-out gear, even last week's lunch are left behind. Use Foam Fresh to keep lockers smelling fresh. Simply spray the interior of the locker and let Foam Fresh do the heavy lifting.

WASTE CANS

Nobody is a perfect shot and a lot of garbage ends up on the can and not in the can. Spray the edges and undersides of lids of waste containers. Foam Fresh keeps your containers fresh and clean.
