

Garden Magic®

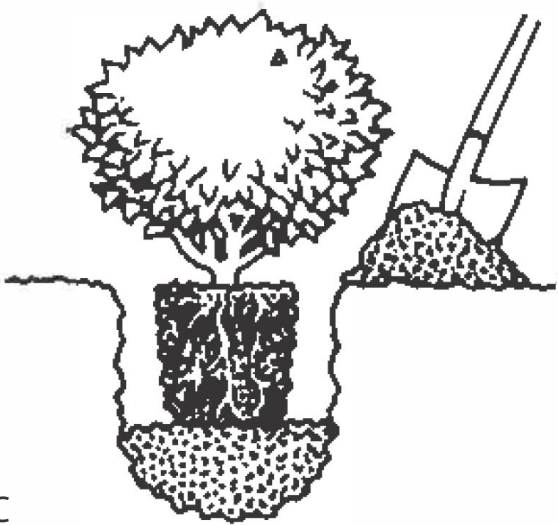

POTTING SOIL

GARDEN MAGIC® Potting Soil is an excellent general purpose mix that is ready to use out of the bag for indoor and outdoor plantings. GARDEN MAGIC Potting Soil allows excess water to drain, yet retains sufficient moisture to sustain active plant growth during moderately dry periods.

Outdoor Planting

1. Prepare a hole 1/3 larger than root ball of plant. For very small plants, make a hole 1/3 larger than the area of the root structure.
2. Fill **bottom** of hole with GARDEN MAGIC **Potting Soil** and place plant so that **top** of root ball is level with ground. Disturb roots as **little** as possible.
3. Fill remaining area with GARDEN MAGIC **Potting Soil**, firming as you fill **to** prevent air pockets, until hole is 3/4 filled. **IMPORTANT:** Firm again at this time.
4. Water well, allowing water to thoroughly seep in before adding rest of soil. **DO NOT tamp** down after watering.
5. Fill remainder of hole to ground level with GARDEN MAGIC **Potting Soil**.

Watering

A thorough watering once a week is usually sufficient **for** most plants. **Avoid** bone **dry** or soggy, wet conditions. **DO NOT OVERWATER.**

Fertilization

Fertilize plants in active growth, especially during spring and summer months. Flowering plants require a fertilizer high in phosphorous. Foliage plants require a fertilizer proportionately higher in nitrogen. Always use a high-quality plant food. Follow directions on package carefully. CAUTION: Always carefully follow the instructions on the fertilizer manufacturer's label for proper application rates and feeding schedule. NOTE: These growing tips are meant only as a guide since conditions may vary from location to location.

Indoor Planting

Note: Follow directions below, except vary size of hole and size of container according to size of plant. If using a container without drainage holes, start with a **bottom** layer of pebbles, gravel or broken pot pieces.

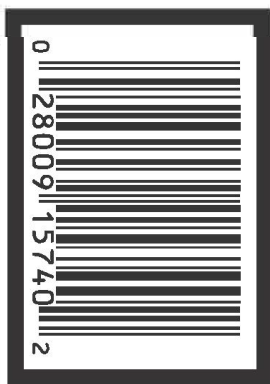

1. Fill container with enough GARDEN MAGIC Potting Soil to accommodate size of plant.
2. In this mix, make a hole slightly larger than the size of plant.
3. Insert plant gently and pack mix around it.
4. Water plant until mix is thoroughly moist and water is seeping out of holes in **bottom** of container.

GARDEN MAGIC products are available for a wide range of gardening needs.
