40 watt 48" Safety Coated F40T12350BL	EL-09S

The **RG-1002** Insect Electrocuter is designed for wall or corner mount positions inside buildings with flying insect problems. The angled rear design of the RG-1002 allows the light trap to fit into tight corner locations. When vertically mounted 1-2 feet above the floor, the 48" U.V. Insect Light shines just above the floor area where flying insects are most active.
