GUARANTEED ANALYSIS

2-2-2

Total Nitrogen (N)2%
 0.60% Ammoniacal Nitrogen
 1.40% Nitrate Nitrogen
 Available Phosphate (P₂O₅)2%
 Soluble Potash (K₂O)2%
 Iron (Fe)0.10%
 0.10% Chelated Iron

Derived from: Ammonium Nitrate,
 Potassium Phosphate and Iron
 Ethylenediaminetetraacetic Acid
 (EDTA).

DIRECTIONS

The amount of light intensity,
 duration and time of year affect
 rate of growth. Plants growing in
 deep shaded areas require less
 fertilizer than when growing in
 well lighted areas.

Mix 1/2 to 1 teaspoon (2.3 to 4.7 cc)
 per gallon of water once per
 month as needed. Adjust amount
 to desired growth & color.

Concentrated Makes 48 Gallons

Lucky Bamboo – Botanical
 name *Dracaena sanderana*,
 symbolizes good fortune in
 many Asian cultures. Plants
 prefer temperature of 45° to
 90° F, and grow best in well
 lighted area, but not direct
 sunlight.

- Change water weekly in the
 Summer or 2 to 3 times a
 month during the Winter or if
 water has malodor. Tap water
 works best, do not use
 distilled water.
- Roots can be trimmed once a
 year, cut length in half.
- Plant's roots grow in water or
 pebbles. Small rocks can be
 added for larger plants. Plants
 will also grow in soil.
