

13-0-44 GUARANTEED ANALYSIS

Total Nitrogen (N).....13.0%
13% Nitrate Nitrogen
Soluble Potash (K2O).....44.0%
(Ingredients derived from Potassium Nitrate)

Stump Remover & Potassium Nitrate does double duty. Use it to speed up decomposition of cut stumps and as a fertilizer. Stump Remover & Potassium Nitrate is a source of nitrogen and potassium and should be used as a supplement to regular fertilizer practices. Apply around shrubs, trees and vegetables, as needed.

HYDRANGEAS: To help maintain pink color of bloom for plants growing in acidic soil, apply 1 tablespoon Stump Remover per foot of shrub height at first sign of bloom.

DIRECTIONS:

STUMP REMOVAL: Drill several 1-inch diameter holes up to 12 inches deep across top of stump and drill slanting downward angled holes around sides of stump.

For fresh cut stumps fill holes 3/4 full with Stump Remover and pour water into holes to dissolve. Stump Remover will be absorbed in a few days.

If the stump is not fresh cut, repeat the above steps, adding more water to get better absorption of material into the stump. As the material is absorbed the stump will decay more rapidly than it would naturally.

In areas that permit burning, light a fire on top of the stump with wood kindling or charcoal briquettes. The heat created will be carried into the stump and roots and consume them. The stump will smolder but should not become engulfed in flames. Only ash will remain.

GROW MORE®

STUMP REMOVER

LIQUID FEEDING: For leaf feeding, dissolve 1 tablespoon per gallon of water. Wet leaves with solution. For soil feeding, dissolve 2 tablespoons per gallon of water. Use one cup of solution over root ball when transplanting. For potted plants, use soil feeding solution when watering, every one or two weeks.

SIGNAL WORD: DANGER

HAZARD STATEMENTS:

May intensify fire; oxidizer.

PRECAUTIONARY STATEMENTS:

Keep away from heat.

Wear protective gloves/protective clothing/eye protection/face protection.

In case of fire: Use for extinction: CO2, powder or water spray.

After inhalation: Supply fresh air. If required, provide artificial respiration. Consult doctor if symptoms persist.

After skin contact: Immediately wash with water and soap and rinse thoroughly. If skin irritation occurs, consult a doctor.

After eye contact: Rinse opened eye for at least 15 minutes under running water. If symptoms persist, consult a doctor.

After swallowing: If swallowed and symptoms occur, consult a doctor.
