Information regarding the contents and levels of metals in this product is available on the Internet at: <http://www.safeco.org/metals.htm>

**Hi-Yield® IRON SULFATE** is recommended to help prevent that yellow and faded-out look in your lawns, shrubs and other plants caused by an iron deficiency.

Iron Chlorosis shows up in a plant through the yellowing of leaves while the veins remain green. **Hi-Yield® IRON SULFATE** is also used to acidify the soil and may be used any time during the growing season.

**DIRECTIONS FOR USE**  
2 cups is approximately 1 lb.

**LAWNS**  
Apply 4 lbs. per 1,000 square feet, using any hand or power-operated granular or rotary type spreader. Water in after application.

**TREES**  
Use ½ lb. for each 1 inch of trunk diameter. Spread out under branches and water in after application.

**SHRUBS**  
Use 1 lb. for each 2 feet of height. Mix into the soil and water in after application.

**NOTE:** Applications should not be made when temperatures are above 85°F as burning may occur. Do not apply to drought stressed lawns and plants. Water the day before application is to be made during dry periods.

**CAUTION:** This product may stain driveways, walks, patios, etc. Sweep off thoroughly, immediately after contact. This product is not intended for nor recommended for container grown plants.
