

# InVite™

multi-moth lure

***Rubber Septa Pheromone lure for Plodia, Ephestia, Indian Meal, Tobacco, Almond, Mediterranean Flour & Raisin Moths***

**InVite™ Multi-Moth Lure** is a rubber septa style lure impregnated with pheromone. Easy to use, the septas can be placed on any glueboard - folded, flat, or hanging, or on a shelf or counter. They can also be used on the D-Sect glueboard inside the D-Sect Station. This use is perfect for retail stores in the pet food and birdseed aisles or other areas where a discreet, "smush-proof" monitor is needed. The lure will

last for about six weeks and can be thrown away or put on another glueboard if the original glueboard gets full of moths while the lure is still active. Glueboards are not included.
