

POA ANNUA AND WINTER WEED CONTROL

Katana® Turf Herbicide is an innovative herbicide that controls *Poa* plus other grassy and broadleaf weeds with post-emergence and some pre-emergence activity. Highly selective in bermuda, zoysia, centipede and buffalo grasses, and seashore paspalum, with both foliar and root uptake, Katana controls a much broader spectrum of grassy and broadleaf weeds than other products of its type – **especially in cooler temperatures!**

WINTER GRASSY WEEDS CONTROLLED:

(See product label for application & timing)

- *Poa annua*
- Ryegrass (annual & perennial varieties)
- Fescue

WINTER BROADLEAF WEEDS CONTROLLED:

(See product label for application & timing)

- Henbit
- Chickweed
- Carolina geranium
- Lawn burweed
- Cudweed
- White clover
- Wild violet
- Dandelion
