Directions:

SHAKE WELL! Apply Liquid Fence[®] Dog & Cat
Repellent directly to landscaped beds, trees, shrubs,
garbage cans or bags and other areas where pets and/
or strays are not wanted. Effectiveness will last a week
or more and continue to work as long as the repellent
is present. Simply repeat applications as necessary.

Liquid Fence Dog & Cat Repellent will not harm
vegetation. Before spraying on objects such as outdoor
furniture or decking, test a small area for staining
acceptability. Recommended for outdoor use only.

Training tip: Initially, to break a pattern of habitual
behavior, the repellent may need to be applied more
frequently. As the animal's behavior is changed, the
application frequency can be reduced.

It's a terrific training aid...

All natural Liquid Fence Dog & Cat Repellent can
help your pets learn the correct behaviors that will make
them become a better part of the family.

How it works...

Pets and strays will habitually visit the same areas,
seeking familiar animal scents, to perform their
"duties". When Liquid Fence Dog & Cat Repellent
is sprayed in these areas, it will mask the familiar
odors, causing the animals to become uneasy, thus
repelling them.
