

The Original Mane 'n Tail® Pro-Tect® Antimicrobial Thrush Treatment goes beyond the every day thrush treatments available on the market today. Our exclusively developed, natural, water based formula is not harsh; will not burn and does not stain. **Pro-Tect®** is a complete antimicrobial treatment that eliminates organisms associated with thrush and other hoof related diseases. Compare this advanced formula to any on the market today, the results will speak for themselves.

Benefits:

- Provides full and complete treatment for the entire hoof
- Gentle, fast acting, deep penetrating formula
- Will not stain, burn or cause irritation
- Pleasant Scent
- Non-Flammable

Why Antimicrobial Treatment?

No matter which organism (bacteria, fungus, etc.) initially creates a hoof problem, there are numerous opportunistic organisms that can additionally invade the vulnerable site preventing healing.

Mane 'n Tail® Pro-Tect® Antimicrobial Thrush Treatment provides complete broad-spectrum effectiveness that eliminates all of these organisms with proven results for faster healing.

Suggested Use: For horses and other animals with hoof problems. Not for use on cats or puppies. Treatment should be daily along with cleaning the hoof. Apply periodically as needed to help prevent reoccurrence.

Additional Concerns: Disease organisms thrive where animals are confined, so providing a clean dry stall or pen is also recommended.

Directions: Clean the hoof thoroughly of dirt and debris. Apply **Pro-Tect® Antimicrobial Thrush Treatment** directly onto hoof. Apply daily to all crevices and skin areas to assure thorough coverage. Massage in where possible with hands or if preferred, a brush. Leave product on the hoof. Do not wash off. It is recommended to apply **The Original Hoofmaker® Intensive Protein Moisturizer** to the outer hoof wall and coronary band to help further strengthen and recondition the hoof.

General Precautions: For external veterinary use only. Do not mix with other medicated thrush treatments. Consult a veterinarian if any problems persist or are of concern. Keep out of the reach of children.

Active Ingredient: Benzalkonium Chloride .75% in an Exclusive **Quatracin®** conditioning base.
