Maggie's Farm Ant & Roach Killer kills bugs fast and repels the most common household pests. Using natural plant oils as the active ingredients in a water-based formula, it leaves no harmful residues. Bugs are tough, but solutions should be simple and effective. Maggie's Farm is committed to offering products that are Simply Effective™. It's as simple as that!

DIRECTIONS FOR USE

**Always read label directions and precautions prior to use.
Shake well before use and periodically during use.**

This product can be used indoors and outdoors.

For optimal spraying, rotate the spray nozzle to point in the same direction as the red dot located on the top rim of the can. Point spray nozzle away from face and press button firmly to spray, holding the can upright. Do not use this product in the same area where you have used a Maggie's Farm insect bait. Baits work by the insect eating them. This product is a contact killer and repellent so you want to be sure not to repel insects from an area where you put down bait.

Crawling Insect Treatment: To kill ants, cockroaches, crickets, earwigs, firebrats, fleas, pill bugs, silverfish, spiders, ticks and other crawling pests, spray product to contact as many insects as possible. To help stop ants and other pests from coming inside, spray all entry points you find, and possible entry areas such as cracks and gaps around window and door frames, around the foundation, and around pipes and wires that come into the building. Repeat as necessary.

Bed Bug Treatment: To kill bed bugs, spray as a spot treatment to sleeping areas in cracks around baseboards, floorboards, doors and window frames. Apply as a surface spray to carpets, floor coverings and rugs around sleeping areas. Spray until wet but not soaking. To treat beds, remove bedding and wash and dry in high heat. Make spot treatments in cracks and crevices on bed frame, headboard and footboard. Apply to tufts, seams and edges of mattresses and box springs only. Do not apply to entire surface of mattress or box springs. If the product scent is objectionable do not apply to the mattress, as it may take a few days to dissipate. Allow the spray to dry before using the mattress. For persistent infestations consult a pest control professional.

Common Sense Precautions

- Keep out of reach of children. We recommend good safety practices when using any insecticide, such as avoiding contact with eyes and skin and avoiding directly breathing spray mist. If product gets in eyes, flush with water for at least 15 minutes. If on skin, wash with soap and water. If irritation persists, or if more than an incidental amount is swallowed, seek medical attention. If seeking medical treatment, have this label with you.
- Plant oil scents can be objectionable to some people, particularly if used in enclosed areas. To get rid of the scent, clean up the spray with

water and dish soap.

- Do not apply to food, feed or plants.
- Keep out of lakes, streams and ponds.
- To prevent electrical shock, do not apply the product into electrical outlets or electrical boxes, or on any bare wires.
- We have tested the product on a variety of surfaces without problems, but it is possible that the plant oils could damage some plastics or finishes or could stain some fabrics or porous surfaces, so test spray a small area first. If clean up is needed, use water and dish soap.
- Treated surfaces may be slippery when wet. Wipe away excess spray with a clean cloth or paper towel..

Physical Hazards: Contents under pressure. Keep away from heat, sparks and open flame. Exposure to temperatures above 130° Fahrenheit may cause container to burst.

Storage & Disposal: Store in a cool, dry area away from heat or open flame. When container is empty, recycle if available. Do not puncture or incinerate.

Limitations of Liability: Maggie's Farm Ltd makes no warranties of merchantability or fitness for any purpose except expressed on this label. Buyer assumes all responsibility for safety and use not in accordance with label directions and precautions.

Maggie's Farm Ltd represents that this product is a minimum risk pesticide and is exempt from registration under EPA FIFRA 25(b). This product is not EPA registered.
